Smith Favors Delay in Home Rule for County

Marshall Smith, assistant state's attorney, has called for "a little house cleaning" on the part of the Madison County government before it attempts to utilize home rule provisions under the new State Constitution.

Smith, legal advisor to the County Board of Supervisors, said he will recommend that the board wait two to four years before it implements provisions of home rule.

Though he favors home rule, Smith said "there are many administration things we should tend to before we complicate things with home rule."

He said the county should first establish personnel and traffic codes, install data processing equipment and a central records system and develop working policies with the county's new Public Buildings Commission.

The county can solve these problems with available money without using extended taxing powers provided by the home rule article in the constitution, Smith said.

The county also could take advantage of results of home rule legislation which will arise, he added, and should have a clearer picture of what it may or may not do.

The board's Legislative Committee, which testified in favor of home rule provisions at the Constitutional Convention in Springfield, has no plans to submit home rule resolutions to the County Board.

The County Board currently is in the process of reappointing the county and it will qualify as a home rule unit when the public elects a chief executive after the reappointment board is elected in 1972.

Home rule units will be granted wide discretion in fund raising and in running their own affairs under the new constitution.

SU-SW BACKS UNITED FUND. Dr. John S. Rendleman, right, chancellor of Southern Illinois University-Southwestern, presents contributions totaling \$402 to the Tri-Cities Area United Fund. Shown, left to right, are George T. Wilkins, campus campaign chairman, and David Norton, representing the Tri-Cities Fund.

SU Mobile Museum to Launch New Season

The Southern Illinois University Mobile Museum, now a familiar sight in school yards throughout Southern Illinois, is about to launch its 1971 season. It will start rolling Jan. 20.

A feature of the SU Educational observance, the big van obtained from the Illinois Central Railroad Piggyback Service will focus attention this year on business and agriculture, according to Darrell Harrison, curator of the Mobile Museum. It will take displays and action devices to more than 15,000 grade and junior high school students.

Highlight of the 1971 exhibits will be a display which Harrison says is designed to "take the mystery out of the computer." The display, pictures, and an actual hookup of a Teletype with a computer center will demonstrate that the computer is a business machine which stores and releases information placed therein by human hands. In fact, many businesses can use the same computer machinery through telephone hookups.

The computer display is a General Telephone Co., of Illinois, Bloomington; Service Bureau Corp., subsidiary of IBM, Harrison, N.Y., and the Center of Management Development of SU's School of Business.

Teletype equipment installed by General Telephone in the Museum's traveling van will be linked by direct wire to a multi-million dollar IBM master computer located in Cleveland, Ohio, to show how data of all kinds may be transmitted and stored or analyzed and returned in a matter of seconds.

Southern Illinois University now is at the halfway point in its five-year observance of its centennial. The Schools of Agriculture and Business are planning lectures, forums, displays and other special events during 1971 which will look ahead to studies and services of the future.

SU-SW Staff, Faculty UF Donations \$11,413

Southern Illinois University faculty and staff at Southwestern Campus have contributed \$11,413.60 to eight area United Fund campaigns.

George T. Wilkins, campus United Fund chairman, has reported.

The Edwardsville-Glen Carbon fund will receive \$6,147 from SU contributions, followed by the Alton-Wood River fund with \$2,352.

Other area funds assisted by SU include East St. Louis, \$849.69; Collinsville, \$804; St. Louis, \$318; Tri-Cities (Granite City, Madison, Venice), \$402; Belleville, \$264; and Troy \$77.

Ends Course in Water Utility Management
 James A. Beran Jr., distribution supervisor of East St. Louis & Interurban Water Co., has completed a course in advanced water utility management technology.

It was announced by O. J. Biehl, Vice President-Personnel, American Water Works Service Co., an affiliate of the local water utility. The week-long course, designed especially for management personnel of the American Water Works Co., System, includes lectures, workshops, and discussions relating to general management functions as well as special subjects pertinent to the operation of public water supply systems.

Mr. Beran was awarded a certificate attesting to successful completion of the course, which was held in Ocean City, New Jersey.

Two Area Couples Obtain Divorces

Two Quad-City area couples have obtained divorce decrees in Madison County Circuit Court at Edwardsville. Divorced were:

William F. Minks of Granite City and Hazel M. Minks of Hopkins, Minn. They were married April 14, 1945, in St. Louis, and separated Feb. 15, 1962.

Donna Fay Ilava from George Lee Ilava, both of Madison. They were married Nov. 23, 1963, in Madison. Mental cruelty was charged. Custody of two children was given to the mother, and the father agreed to pay support of \$90 per month for each child.

Two Autos Collide

Autos driven by Dorothy M. Hartzel, 2801 Fortune Drive, and Dennis R. Asbeck, 2907 Edwardsville Road, collided at 4:45 p.m. Wednesday at Faith and Warren avenues.

Five Plead Guilty To Lesser Counts In Truck Sniping

Five men who were charged with murder in the fatal sniping of a truck driver during the Thanksgiving holiday were permitted to plead guilty to reduced charges of involuntary manslaughter Wednesday afternoon in the court of Associate Circuit Judge Michael Kinney at Edwardsville.

The defendants are Roy Miller, 38, and Jackson Wofford, 29, both of Rural Route One, Granite City; Frank Thompson of Mitchell; Willard Combs, 48, of Collinsville; and Jerry Lambert, 31, of Caseyville.

They applied for probation, and a hearing on mitigation and aggravation was set for 1 p.m. Jan. 28. They remained at liberty under bond.

The five men first pleaded innocent to the murder charges. Judge Kinney then accepted guilty pleas to the reduced charges. They first were indicted on charges of attempted murder until the truck driver, Gary Kistler, 30, of Pickering, Ohio, died of wounds on June 29 at Grinnell Desloge Hospital, St. Louis.

Kistler, a driver for Consolidated Freightways, was shot along Interstate 70 near Marion. He was one of three truck drivers wounded when snipers opened fire on a truck convoy headed west along I-70 two miles east of Marine early on May 5.

Authorities at the time said the snipers apparently were with a gang that had tracked the trucks by using citizen band radios.

The other two victims in the sniping were Donzell Smith, 30, of Stamping Ground, Ky., and Allen Latham, 47, of Georgetown, Ky. They suffered leg wounds and were later released from St. Joseph Hospital Hospital at Highland.

Walter Newsome, 80, Dies; Madison Resident

Walter Newsome, 80, of 909 Franklin St., Madison, was pronounced dead upon arrival at St. Elizabeth Hospital at 4 p.m. Saturday. Death was attributed to a heart attack.

Mr. Newsome had been a resident of the Quad-Cities the past 70 years. He was born in St. Louis and emigrated 50 years at Western Forded Co. St. Louis prior to retirement. He was a member of Bethel A.M.E. Church of Venice.

Survivors include his wife, Mrs. Betty (Ward) Newsome, one son, Larry Newsome of Madison; and a brother, Frank Newsome of Ontario, Canada.

Funeral services are scheduled at 8 p.m. Wednesday at the Bethel A.M.E. Church from an East St. Louis mortuary.

Parked Autos Struck

The parked autos of Arlie Mercer, 3223 Westchester Drive, and John Perkins, 2024 Mockingbird Lane, were struck by a hit-and-run driver while they were on a lot at 2:50 p.m. Madison Avenue at 5:50 p.m. Thursday.

47 Burglary, Theft Cases Cited; Man Robbed at Home

Burglars and thieves were active in the Quad-City area during the New Year holiday as 47 cases of crime were reported to local and Madison County police authorities.

A man armed with a knife forced his way into the home of Gerald Childers, 212 Jeanette St., and stole a series of articles and children's auto at 12:45 a.m. today, it was reported to Madison County authorities.

Childers said he heard a knock on the door and opened it, thinking it was a neighbor, and the man ordered him to get into another room where he was forced to lie on his stomach. He was bound with neckties.

Taken were about \$100 cash, a gray suitcase, a television set, an electric toaster, a wrist watch, shirts and trousers and a 24 caliber revolver.

Childers said the bandit obtained his car keys and took his 1968 Ford Mustang to the Seventh Street and Madison Avenue, Madison.

House Burglarized

Items valued at about \$600 were taken from the home of John Nishke Sr., 1441 Fourth St., Madison, while the family was on a three-day holiday in Missouri. Nishke told police at 4:30 p.m. Sunday.

Nishke said the family left town Friday and discovered the theft Sunday. The house was ransacked while the family was away. A \$250 mink cape, were missing. Also missing were three clocks worth about \$175, a television set, a 19-inch portable television set, a pocket watch and Army medals.

Auto Accident

A 1968 auto owned by Rufus Lemus, 2138 Benton St., was stolen from Pontoon and Nameoki Roads and later was involved in a hit-and-run accident at Pontoon Road and Highway 151, it was reported at 8 p.m. Thursday. The car was towed to a garage.

Mildred Jolly, 2396 E. 27th St., reported at 12:15 p.m. Thursday that 60 or 70 pennies were stolen from a chest and a cabinet was pried open with an unknown amount of change removed in a burglary at her home. The rear door was unlocked.

Truman Arnold, 2202 Illinois Ave., reported at 10 p.m. Thursday that his Army and civilian clothing valued at \$400 was stolen from his auto while it was parked at his home.

Charles Westbrook, 2156 Adams St., reported at 1:40 a.m. Friday that a 12 gauge shotgun was missing from his home. It was valued at \$75.

John Logue, 2032 Twelfth St., reported at 3:45 a.m. Friday that a box of tools was stolen from his auto while it was parked at the American Legion. They were valued at \$75.

An undetermined amount of cigars were stolen in a burglary at the A&K Market, 2093 State St., Madison Avenue, it was reported at 7:25 a.m. Friday. Entry was gained by breaking the door and taking with an empty metal milk case.

Santa Claus Stolen

Evelyn Fuller, 1841 Bremen Ave., reported at 1 a.m. Friday that a 21-inch plastic Santa Claus with lights, an outdoor ornament, was stolen from her home.

Allan D. Ellsworth, 1861 Spruce St., reported at 8:40 p.m. Thursday that a stereo tape player valued at \$116 and 15 tapes valued at \$75 were stolen from his auto. The vent was forced.

William Earhart, Rural Route One, reported at 1:20 a.m. Friday that a stereo tape player and four tapes valued at \$85 were stolen from his auto parked at 3700 Johnson Road.

A burglar broke open a pool table, juke box and cigarette machine which contained no money, it was reported at 8:50 a.m. Saturday. There was no forced entry, and exit was made by removing pins from the side door.

Ignacio V. Galvan, 1726 Maple St., reported at 1:50 p.m. Friday that his pocket was picked of his wallet containing \$70 at the Good Neighbor Tavern.

Loretta Ray, 3205 Kirkpatrick Homes, reported at 4:30 p.m. Friday that a box containing personal papers and insurance documents, plus \$5, were stolen from her apartment. Entry was gained by breaking a hole in the front door glass.

Christmas lights valued at \$30 were stolen from shrubs at the home of Gary Pfrender, 2313 O'Hare Ave., during the last two weeks, he reported at 2:50 p.m. Friday.

A car stereo tape player valued at \$60 was taken from the home of Lee Rumpf, 620 Washington Ave., Venice, while parked in the 1500 block of Fifth Street in Madison, Rumpf told police at 5 a.m. Thursday.

Dusty Ragdale, 2328 Iowa St., reported to Madison County authorities at 9 p.m. Wednesday that a stereo tape player valued at \$50 to \$75, tapes valued at \$75 and a tachometer were stolen from his 1963 convertible auto while it was parked on the lot at the Bowland alley. Wires were cut, and a large knife was left on the floorboard.

Mrs. John Homess, 2100 Glen Drive, reported at 4:50 p.m. Wednesday that two white gold wedding rings valued at \$280 were stolen from a jewelry box at her home after Dec. 24. One ring contained a diamond.

Alice Walker, 2115 Lee Ave., reported at 7:30 p.m. Wednesday that a \$303 caliber British Remington-Union City .38 Smith & Wesson short barrel was stolen from a bedroom closet at her home while the family was out of town.

Tavern Burglarized

Burglars broke into Joe Reschner's Tavern, 1200 Iowa St., Madison, and took 12 cases of beer from a cooler Thursday morning. The west door of the storeroom behind the tavern was pried open and the door casing broken. The tavern was closed for the night.

The building apparently had not been entered. The robbery was discovered at 8:45 a.m. Thursday.

About \$20 was stolen from an unlocked coin changer in a burglary at the Washburn Laundry, 2506 Nameoki Road, it was reported at 10:45 p.m. Wednesday. Entry was gained by smashing the lock off the side door.

Paul Wilson, 2424 Ohio Ave., reported at 10:15 p.m. Wednesday that a child's pedal-type red fire truck about 5 feet long was stolen from his back yard after 6 p.m.

A new 11-1/2 ton jack was stolen from the front of the garage at Ralph's Texaco Station, 22nd Street and Madison Avenue, it was reported at 9:30 a.m. Thursday.

A typewriter and a calculator were stolen during the night in a burglary at the Worthen Brick Co., reported at 1:40 a.m. Friday. It was reported at 11:20 a.m. Sunday.

Curtis Walker, 2038 Milan Ave., Madison, reported at 2:10 p.m. Sunday that his 1969 auto was stolen during the night while it was parked in the Honda Agency, E. 23rd Street and Nameoki Road. It was yellow with a red stripe on the license.

About 200 comic books, including "The Price of Ashes" by Roy Thebeau, have been increased in value at all. But don't add until fire reduces your underinsured home. See me and I'll explain how a State Farm Homeowners Policy with inflation coverage can keep your home insured for all it's worth.

MORE ABOUT

Moerlien

Ward One for many years prior to redistricting of ward boundaries two years ago. At that time the area in which Moerlien lived was redistricted into the Fifth Ward. Moerlien thus became alderman-at-large until his term expired.

Moerlien has served 18 years on the council. He was elected alderman in 1939 and served until 1945 when he was elected mayor. He served one term as mayor. He was elected again as alderman in 1963, serving in that post since.

Parked Auto Struck

The left side of the auto of Anthony Rance, 2666 Washington Ave., parked at his home, was struck by a car driven by Frank Walker, Caseyville, at 9:45 a.m. Saturday. Walker later contacted the police station.

Sideswiped on Bridge

Police are investigating a report from William Shumper, 20, of St. Louis, that his auto was sideswiped by a hit-and-run motorist on the McKinley Bridge at 8 a.m. Saturday. The auto received damage to the left front fender in the collision.

Family of 8 Homeless in Fire Today

A family of eight was left homeless when fire swept its home at 2100 Troy Ave., Cloverleaf Addition, 8:30 a.m. today, destroying everything but what they were wearing.

The family to Bobby Wood made a plea for assistance and said clothing and housing were badly needed. Three of the six children attend Madison schools and the family wants to find a house in Madison.

Wood was at work when the fire started and his wife, Marjorie, and three of the children were visiting Mrs. Wood's mother, Mrs. Iva Taylor, 2122 Harris St., when a neighbor phoned them of the fire. The other three were at school.

Madison firemen were called and they requested help from the Venice fire department. Firemen brought some of the smoldering furniture out of the house and onto the lawn.

Mrs. Wood said new or used clothing can be used. The oldest child, Bobby, needs size 10 shirts and pants, 9½ shoes and 12 coat.

James, nine years old, needs size 8 shirts, 8 pants, 8 coat and 1½ shoes. Dale, eight, needs shirts and pants, sizes 8 and 7, 8 coat and size 2½ shoes. Larry, four, wears size 4 shirts, pants and coats and 9 shoes.

The two girls are Belinda, three, and Carol, two. Belinda needs size 3 dresses and coats and 7½ shoes, and Carol needs size 2 dresses and coats and 6½ shoes.

Mr. Wood wears size 14½ shirts, 29-31 pants and 9½ shoes and his wife needs size 38

Reidelberger Resigns As Probation Officer

James Reidelberger of Venice, chief adult probation officer for the Third Judicial District, submitted a letter of resignation, effective March 1, to Chief Circuit Court Judge William Beatty last week.

He has served in the post for the last 12 years. He said he wanted to afford the judiciary ample time to select a replacement.

His letter said "at present I am considering several new opportunities that I can't afford to pass up."

22nd-Grand Accident

Ruby Gibson, 2326 Logan Ave., was charged with a right-of-way violation after her auto collided with a car driven by Charles Arbelter, 2448 State St., at 7:55 p.m. Sunday at 22nd Street and Grand Avenue.

Atchison Hits 300 Game at Pin Party

Bill Atchison, 1724 Spring Ave., went from a game of 38 to a 300 game at a New Years Eve bowling party held at Bowland.

In a game where everyone had to bowl with the hand they did not normally use Atchison scored a 38. When the bowlers resumed their regular stance he came through with the perfect game and received a \$150 cash prize.

Atchison, a cement finisher by trade, bowls in three different leagues and has an overall average of 200. He has been bowling for the past 10 years.

Hunters Bag 8,756 Deer in Illinois

Illinois hunters bagged 2,029 deer in the second half of the shotgun season, according to Jim Lockhart, supervisor of wildlife resources for the Illinois Department of Conservation.

This brought the incomplete total for the shotgun season to 8,756 deer killed, an increase of 386 over last year's total. He said a complete and accurate total will not be available until records from all deer checking stations have been tallied.

During the second season, 30 Davis led all counties with 153 killed. The largest deer taken was a 221-pound field-dressed buck in Henderson County, Lockhart said.

There were 46,880 permits sold during this year's hunt, which indicates that one out of every five bagged their deer. During the season, 440 arrests were made by law enforcement officers. Improper clothing was the most common offense. Uncased guns in vehicles accounted for the second greatest number of arrests.

Deer were still being hunted by bow and arrow until last Thursday.

Warriors Tie for 3rd, Lincoln Wins Mat Title

East St. Louis Lincoln returned home Wednesday evening with the winners trophy from the Granite City High School holiday wrestling tournament, while the Warriors were forced to settle for a third-place tie.

Lincoln finished the two-day event with a total of 84 points and was followed by Sterling with 49. Granite City and Peoria Richwoods each had 44 points.

Bethalto and East St. Louis tied for fifth place with 21 points and Stephen Decatur, who was expected to finish high in the rankings, finished in seventh with 19.

Another touted entry, Wood River, collected only 16 points for eighth place. Other team positions and their scores were: Belleville-East, 15; Bloomington, 14; Alton, 13; Jacksonville, 12; Roxana, 5; Carbondale, 4; Edwardsville, 2; and Champaign Central, 0.

Warriors champions were Mike Garland in the 119-pound class and Tom Eaton in the 132-pound class. Heavyweight Mark Mizerski of Granite City

Press-Record Sports

Page 4 Mon., Jan. 4, 1971

was defeated by Robin Rummel of Peoria in their championship bout.

Both championship victories were over Lincoln wrestlers. Garland defeated Joe Pette for his crown in a 14-6 match and Eaton defeated Herb Jones 3-0. Mizerski only lost by one point, 4-3.

"We were happy we got third," Coach Bill "Red" Schmitt said Thursday morning, and added, "I would have been very unhappy if we had gotten anything less."

Commenting on the performance of his squad, Schmitt said, "I was pretty well satisfied with the performance as it went. We have a long way to go but I think we're on the way."

The Warriors collected a team record of 38 wins, 17 by pins, 18 losses and two ties during the tourney.

DISPLAY HOMES
OPEN DAILY
WILSON PARK ESTATES

THE EVER PRESENT Granite City High School cheerleaders go all out in helping Tom Kalert through his bout. In the bleachers in the background of the high school gym are wrestlers from 15 other schools waiting their turn. In the balcony are some of the many fans on hand at the holiday tournament.

World Champion Girls Cage Squad to Appear

The Boosters of the Fighting Warriors will sponsor a "celebrity" basketball game Wednesday, Feb. 10, featuring a World Champion All Girls basketball squad—the All American Red-heads. It was announced this week.

Plans for the fund-raising event will be finalized at 7:30 p.m. Wednesday when Booster club members will meet in the cafeteria at Coolidge Junior High School.

Anyone interested in assisting with the special promotion is invited to attend the meeting. Proceeds from the Feb. 10 game will be used to benefit athletics programs at Granite City High School.

ATTENTION FOCUSED on the Granite City bouts during the holiday tournament. Here Warrior Doug Wilson fights for a 6-4 win over Les Williams of Bloomington during the festival.

Oneida Stainless for Savers

Free 5-Piece Place Setting of Forever Rose by Oneida. Retail Value \$5.50.

Build your Oneida Collection with these Saver Sets

HOW TO GET FREE ONEIDA: Open a new savings account with \$50.00 or more or add \$50.00 or more to your current savings account.

HOW TO ADD TO YOUR SET: Every time you deposit \$50.00 or more to your savings account, you can have another place setting or one of the other Saver Sets shown above for just \$2.50 plus tax. That's less than half of the retail value. So while you're saving money, and earning highest dividends you're also collecting fine Oneida at a substantial savings. And the more you save, the more Oneida you can get. Also, you can have the 60-piece set of Oneida tableware all at once, complete with a handsome chest, for just \$24.95 plus tax when you make a savings deposit of \$500.00 or more. Retail value of the complete set is \$45.00.

WHERE TO GET YOUR TABLEWARE: Oneida's Forever Rose stainless steel is on display and available to owners of First Granite City Savings & Loan. Stop in and open a new account or add to your present one. If you're a new saver, ask the teller about our many savings plans. You'll find that one is especially well suited to your savings goal. And so matter which plan you choose, the free Oneida place setting will be yours when you deposit \$50.00 or more.

Set of six teaspoons
Set of six flat spoons
Serving set, pierced tablespoon, knife, and cold meat fork
Completion set, two tablespoons, pierced tablespoon, butter, knife, and sugar spoon

Warrior Cagers Win Pontiac Tournament

Granite City's basketball Warriors returned home Thursday afternoon champions of the Pontiac Holiday Tournament defeating Normal University High 54-47.

U. High had a first quarter lead 13-7, but the Warriors came back strong in the second quarter and took the lead at 30-20. A hectic third quarter ended at a 40-40 tie, but the Warriors came back in the fourth quarter outpacing U. High 14 to 7 to win.

Jubilant Coach Don Deterding offered credits: "Our defense won the tournament. The guards responded well to the press. We still not playing at our peak, but if we continue to improve there is still a possibility we will be back in the conference race."

"This tournament victory has shown the team what hard work can do, and that they can be, if they want to be, a really great ball club."

U. High was 11 and 0 going into the championship while the Warriors are now 7 and 3.

GCBS led 20-18 in field goals and 14-11 in free throws.

U. High made 17 fouls and the Warriors 11.

Other Warriors scoring against U. High were Terry Ripka 16, Joe Wallace 12, Chuck Kraus 6 and Bob Wiggins 1.

The biggest hurdle getting to the championship game was beating Chicago Bloom.

Bloom is rated fifth in the state, but the Warriors eked out a 67-66 victory.

Granite led 12-9, 30-26 and 48-46 at the quarter marks, and the final quarter saw Bloom outscore the Warriors 20-19.

Coach Deterding explained, "Our zone press cost Bloom 33 turnovers which made them hurt. As in the game against U. High I must give the credit for victory over Bloom to the defense."

High point man for Bloom and the tournament was center McCoy with 25 points. McCoy scored a total of 120 points in the four games.

Terry Ripka was the Warrior high point man with 29. He was second top tournament scorer with 106 points.

Scoring against Bloom were DeKuntz 20, Wiggins 10, Wal-

lace 5 and Kraus 3.

In commenting to the Press-Record Coach Deterding said, "I was really happy with all the fans that went to Pontiac. The cheerleaders did a real good job in keeping the spirits of the team up. We sure were in a hostile gym. I'd say there were 200 fans for us and 3,800 for Normal. The cheerleaders and fans gave a party for the team after the championship game and this was appreciated."

"We may get a rating in the top 16 now, although the three defeats against us hurts. How-

ever, we have won the last five games straight. The future both this year and next looks good as DeKuntz is the only starting senior."

"But it is one of the trophies we can't keep unless we win the tournament three years. No team has won it two years in succession since 1941 when Centralia did."

"Next year we have a good chance, but I feel we're going to have to watch out for LaSalle-Peru."

Madison travels to Granite City for a basketball game Tuesday.

Trojans Bow 67-53 to Host Edwardsville in Cage Finale

Madison High School's basketball Trojans lost the consolation finals of the Edwardsville tournament to Edwardsville 67-53 Wednesday after defeating Sparta 96-69.

Bloomington won the championship by defeating East St. Louis 45-36. Second place went to Cahokia with an 87-74 victory over Gillespie while Triad downed Sparta 72-48.

Larry Boyd, 6-2 senior forward, was high point man for the Trojans in the tournament, scoring 24 against Sparta, 12 against Johnson City and 21 against Edwardsville.

Madison led Sparta 21-17, 40-32 and 60-47 at the quarter marks.

The Trojans outshot Sparta 23 to 28 from the field and 24-13 from the free throw line. Sparta committed 20 fouls compared to 13 by the Trojans.

Edwardsville Freshman Greg Ahart scored 23 points and was the only player to make the all-tournament team.

Bloomington's Dave Giles, 6-7 center, scored 24 points against the Flyers and 91 points in the four games played.

In a highly defensive style game the champs held East St. Louis scoreless in the first period.

James Moore, who scored 32 points for East St. Louis in a semifinal game with Cahokia, was held to 3 points against the Raiders.

The Trojans gave Edwardsville a good run in the consolation finals.

The Trojans led Sparta 13-13 in the first quarter, Edwardsville squeaked ahead at the half 31-28, and the Trojans came back in the third quarter, tying the score at 47-47.

Edwardsville got hot with 20 in the final stanza, while the Trojans connected with only 6 points.

The Tigers led the Trojans in field goals 25-22 and free throws 17-9. Fouls hurt the Trojans.

By Press-Record Staff Photographer
LARRY BOYD

They committed 21 to Edwardsville's 13.

Barkhall tied Boyd for high point man honors with 21. Ed Chandler scored 5, and Fletcher, Glasper and Young had 2 each.

Edwardsville Freshman Greg Ahart scored 23 points and was the only player to make the all-tournament team.

Bloomington's Dave Giles, 6-7 center, scored 24 points against the Flyers and 91 points in the four games played.

Cougars Blast Tennessee in 103-76 Game

"Who do you play next," asked Coach Floyd Burdette of the University of Tennessee at Martin after his Vols cagers had been blasted, 103-76, by the Cougars of Southern Illinois University - Southwest on New Year's Day on the losers' court.

It was SIU-SW best game of the season and ran Coach Jim Dudley's team record to 8-2, one more victory than the Cougars posted all last year.

Burdette, interviewed right after his team's loss, was still in a state of shock. He was told that the Cougar's next opponent is the University of Illinois, Chicago Circle, whom they will host tomorrow night at the Edwardsville High gym with tip-off time at 8:15 p.m.

"You've already beaten them, haven't you . . . on the road, too," Burdette said, shaking his head. "SIU-SW did beat the Chikass, 85-81, at Chicago on the Cougars' three-game road trip before Christmas."

"I've never in my life seen such an improvement made in a team as SIU-SW has shown in these last three games," Burdette said. "How in the world did UMSL (the University of Missouri at St. Louis) beat you all . . . what was the score (97-75) . . . in your opening game?" he asked.

"I've beat them in St. Louis the night before SIU-SW beat us, 85-75, and then two nights ago, here in Martin, UMSL just barely beat us, 71-70, on a great individual performance by their Mark Benson."

"I've never in my life seen such an improvement made in a team as SIU-SW has shown in these last three games," Burdette said. "How in the world did UMSL (the University of Missouri at St. Louis) beat you all . . . what was the score (97-75) . . . in your opening game?" he asked.

GC Swimmers Place In Belleville Meet

Three Granite City swimmers placed in one of the largest meets held on the Illinois side of the bi-state metropolitan area which concluded yesterday at the Belleville YMCA.

The AAU-sanctioned swim meet, co-sponsored by the East St. Louis and Belleville YMCAs, attracted 596 competitors representing 24 teams from Chicago to the southern Illinois region.

Continuing his dominance in the breaststroke event, Mark Buegener of Granite City, competing in the 11 and 12 year old division, captured a first place award in the 50-yard breaststroke; a second place, 100-yard freestyle; and tied for sixth place in 50-yard backstroke.

"This younger brother, Scott Buegener, entered in the 25-yard breaststroke event, won a third place ribbon in the 8 years and under division. They are sons of Mr. and Mrs. Earl Buegener, 2128 Lindell Blvd.

In the 13-14 year age group, Paddy Jim Baggot, son of Dr. and Mrs. Gerald W. Baggot, 2650 Edison Ave., earned a third place ribbon in the 100 yard breaststroke; fourth places in the 200-yard individual medley and freestyle events; and tied for sixth place in the 100-yard freestyle.

Members of the Granite City Tidal Waves relay squad, which placed, include — third place, 8-10 girls — Resaleen Baggot, Janet Becherer, Shelley Pohlman and Shannon Stocker; fourth place, 9-10 boys — Robert Mann, Tom Becherer and Ron and David Jolly; sixth place, 11-12 girls — Connie Hines, Debbie Griffin, Erin Stucker and Debbie Barnes.

Clearly earmarked him as the Cougars' floor general, the Venice native—the smallest regular on the squad at 5-11 has worked hard on his defensive play.

John "Champ" Summers, who with Essington are the only two players from last season's squad, is fast regaining the form which made him the Cougars' scorer during the 1969-70 campaign with a 23-point game average. He's currently hitting 10 points per game and is the Cougars' third best rebounder even though he hadn't nearly as much total playing time as leading rebounder Roy Whitloff.

Jerry Bleemer owns the Cougars' best field-goal shooting percentage, a 47.6 figure, compared to Thronburg's .473 and Essington's .451.

Thronburg also continues to lead the Cougars in overall scoring with a 20.30 per game average. Essington, Denny's running mate at guard, is hitting at a 17-point clip. In the "assist" column, it's Essington with a whopping lead, having racked up 89. Thronburg is second in assists with 32.

Essington's play has, to date,

Mississippi Transmission Corp. Asks Rate Increase

Mississippi River Transmission Corp. natural gas pipeline company serving the Illinois-Missouri Metropolitan area, has asked the Federal Power Commission for an increase in its rates for gas delivered to distributing companies and municipalities in Arkansas, Illinois and Missouri.

Granite City PRESS-RECORD
Page 6 Mon., Jan. 4, 1971

R. V. Terry, president, said the increased rates which were filed last week are estimated to provide additional revenues of \$10.6 million effective July 1, 1971, over rates in effect prior to that date. Under the Federal Power Commission order approving its basic rates effective Jan. 1, 1970, Transmission is authorized to adjust its rates currently for increased costs of gas from pipeline suppliers, Terry said.

"The increase in basic rates which we are asking is essential," Terry said, "to enable us to raise the capital to continue the heavy investment required to meet the demand for gas in our market area." "Our Company has been able to supply additional gas to the St. Louis area while new supplies to other parts of the country are being restricted or unavailable," Terry pointed out. "We are daily supplies to our utility customers in this area by about 135 million cubic feet per day, with access to three major pipeline sources—one of or 22 percent, in the past three years, including substantial increases this year," Terry stated, "and we are continuing to plan further expansion in order to stay ahead of the demand."

"Transmission has spent approximately \$56 million since 1967, to supply these increases to the Metropolitan area," Terry said. He explained that this gas is going to be at substantially higher prices. "We have increased firm has more than doubled Trans-

mission's investment in facilities in a three year period. "The cost of this expansion, however, is very substantial. In this connection, Transmission sold \$35 million of bonds in November at an interest cost of 9.75%, and additional financing will be undertaken in the near future. This will include equity financing," Terry continued.

"More new capital must be attracted for further expansion of the pipeline system if we are to serve the ever increasing needs for gas in our market area," Terry stated. "The costs of meeting the demand for this fine fuel, however, are great and must be recognized in increased rates."

Charged For No License
Venice police charged Connie A. Henry, 19, of East St. Louis, with having no driver's license after this auto was stopped on Broadway at Main Street at 3:10 a.m. Friday. He was released on a \$25 bond and was ordered to appear in Madison court at 10 a.m., Jan. 20.

mission's investment in facilities in a three year period. "The cost of this expansion, however, is very substantial. In this connection, Transmission sold \$35 million of bonds in November at an interest cost of 9.75%, and additional financing will be undertaken in the near future. This will include equity financing," Terry continued.

George Tanase, 56, Burn Victim, Dies

George Tanase, 56, of Glen Carbon, a former resident of Madison, died at 2:30 p.m. Thursday at Barnes Hospital, St. Louis, of burns received five weeks ago when he dropped a gasoline can near the furnace of his home and it exploded.

Mr. Tanase was born in Illinois, Mo., and moved to Madison when he was nine years old. He lived here 19 years before moving to Glen Carbon. He was a galvanizer at Granite City Steel Co., north plant, and was presented with a gold watch for 25 years service last week in the hospital. He was a member of the United Steelworkers, Local 30.

He is survived by his widow, Mrs. Anna L. Tanase; one daughter, Mrs. Samuel (Carol) Makler of Edwardsville; four brothers, John and Vasil Tanase of Madison, Trayon Tanase of Granite City and Nick Tanase of St. Louis; two sisters, Mrs. Emil (Anna) Rudolka and Mrs. Henry (Henly) Minceff of Granite City; four grandchildren.

Funeral services were to be held this morning. Details are given in today's obituary column.

Wesley G. Crews, 54, Expires in Hospital

Wesley G. Crews, 54, of 4132 Rode Ave., died at 4:30 p.m. Friday at Barnes Hospital, St. Louis, where he was a patient since Dec. 16. He had been ill four years.

A native of Beardstown, Ill., he resided here five years and was employed at American Steel Foundries. He was a member of the Assembly of God Church.

He is survived by his wife, Mrs. Zola Crews; two daughters, Miss Glenda Crews of Springfield and Mrs. Kenneth (Marcia) Tibbs of New Holland, Ill.; three sisters, Mrs. Beatrice Plunkett of Orenzeville, Ill., Mrs. Mabel King of Blue River, Wis., and Mrs. Evelyn Avery of East Peoria; two brothers, Sylvan Crews of Beardstown and Francis Crews of Gregeville, Ill.; his mother, Mrs. Minnie Crews of Beardstown; and one grandchild.

An obituary notice appears elsewhere in this issue.

Arthur Bryant Dies; Construction Worker

Arthur A. Bryant, 67, Wood River, a construction truck driver, died at 6:45 p.m. Wednesday at Barnes Hospital, St. Louis. He was married on Oct. 8, 1925, in Granite City to the former Opal Oglesby, who survives.

Born in Malan, W. Va., Mr. Bryant moved to Wood River 45 years ago. Also surviving are a daughter, three sons, one brother, one sister and 13 grandchildren.

Services were held this afternoon at a Wood River funeral home, with burial at Rose Lawn Cemetery, Bethalto.

SPEC. 4 JOHN CAWLAY Commended

Intelligence Analyst Commended in Letter

Specialist Four John D. Cawley of Madison, who is serving with the 11th Armored Cavalry Regiment in Vietnam, has received a Letter of Commendation from Colonel Eric A. Erickson, General Staff, Director of Security, Plans and Operations, U. S. Army-Japan.

The serviceman is the son of Mr. and Mrs. Porter Cawley, 1520 Fourth St., Madison. Spec. 4 Cawley was awarded the commendation dated Oct. 26, for the superior performance of duty while serving with the Security Branch of the Security and Intelligence Division, Directorate, Security, Plans and Operations, from March 3 to Aug. 26, 1970.

During the five month period, Spec. 4 Cawley served with the Army's Security Branch in Japan. He was reassigned in September to the 51st Military Intelligence Detachment, 11th Armored Cavalry Regiment, in Vietnam. Presently he is stationed about 18 miles north of Saigon.

The Letter of Commendation states in part: "As an intelligence analyst working in this important activity, you demonstrated outstanding ability in preparing and processing a heavy workload involving correspondence, control and maintenance of investigative files and suspense actions, and shipment of various intelligence documents."

"The end products you produced were always examples of efficiency and timeliness. Your capacity to perform under the most difficult circumstances, plus a sense of humor exhibited even under trying circumstances, contributed much to the successful operations of the Security Branch."

"Again, let me take this opportunity to thank you and wish you well in your new assignment. All of those who have worked with you join me in wishing you the very best for the future. Eric A. Erickson, Colonel, General Staff, Director of Security, Plans and Operations."

The formal Letter of Commendation was accompanied by a congratulatory note from the serviceman's current commanding officer, who stressed the importance of the work in which Spec. 4 Cawley is now engaged in Vietnam.

Spec. 4 Cawley, 21, was graduated from Granite City High School. He attended Southern Illinois University-Southwestern campus for two years prior to joining the Army in August 1969.

PROUD FISHERMEN, left to right, Mark Coy, Pete Krieschok and Jim Robbers, display a string of large-mouth bass ranging from 3 to 9½ pounds. They caught the lunkers last week while fishing from the Fouts Boat Dock in Gamical, Ark. Jaw Breakers and Sonars were used as lures.

\$4.8 Million Loss To Idle UE Employees

A six week strike by Operating Engineers Local 148 against Union Electric Company has resulted in a \$4.8 million wage loss to the utility firm's 4,400 employees through last Friday, a company spokesman said.

The strike began Nov. 20 in a dispute over work assignments at the Portage des Sioux power plant and spread to the utility's nine plants in Iowa, Missouri and Illinois, including those at Venice and Cahokia.

A settlement offered by the company in mid-December was rejected by the Operating Engineers primarily because Union Electric refused to lift the suspensions of two men employed at Cahokia. The issue still has not been settled in negotiations, it was learned.

A federal mediator said a negotiation session is tentatively scheduled for today. In an effort to resolve the stalemate, the Utility Consumers Council of Missouri has offered to mediate negotiations if the Federal Mediation and Conciliation Service agreed.

Three Autos Damaged

An auto driven by Garnett Williams, 2808 Birch St., struck an auto driven by Barbara S. Shepperd, 208 Kirkpatrick Homes, at 7:10 p.m. Thursday at 2708 Edwards St. The parked auto of R. D. Burkett, 305 Kirkpatrick Homes, was struck in the rear.

Calvin Lazenby Named To Steering Committee

Calvin Lazenby Jr., 2837 Wayne Ave., has been named a member of the 1971 Portrait Division steering committee of the Professional Photographers of America, Inc.

The PP of A is the oldest and largest association of professional photographers in the world, with headquarters in Des Moines, Ill. The organization provides educational services and establishes standards of professional performance for its more than 12,500 members and 150 local, state and regional affiliates.

Mikesell Will Speak

Theodore Mikesell, executive director of the Southwestern Illinois Metropolitan Area Planning Commission, will discuss area planning at the next meeting of the Metro East Chambers of Commerce Association at 6:30 p.m. Monday, Jan. 11, at the Flaming Pit, Edwardsville.

Coming Jan. 20th!

Edward Cummins, 77, Dies, Here 53 Years

Edward E. Cummins, 77, of 4050 Lake Drive, died at 11:01 p.m. Thursday at St. Elizabeth Hospital where he had been taken six hours earlier after suffering a sudden illness at home. An inquest will be conducted to determine the cause of death.

Mr. Cummins was born in Tiff, Mo., and lived here 53 years. He retired 10 years ago from the Granite City Army Depot where he was a receiving clerk. He was a member of Masonic Lodge 555 and the American Legion in Granite City. His wife, Mrs. Margaret Cummins, preceded him in death in 1960.

He is survived by one brother, Samuel Cummins of Kansas City, Mo.; three sisters, Mrs. Lilly Sizemore of Tiff, and Mrs. Margaret Kelsey and Mrs. Lyman Sizemore of St. Louis.

Funeral services were held today. Details may be found in today's obituary column.

Two Autos Collide

While changing lanes, an auto driven by Marcia M. Hettnerhouse, 809 Greenwood St., Madison, struck the right front of a car driven by Delora M. Shrenk, 108 Troecker Lane, at 3:40 p.m. Saturday at Nameoki Road and Richmond Avenue.

Lighting at Shrine Continues This Week

Nightly lighting of the Nativity setting and Christmas Way of Lights at the Shrine of Our Lady of the Snows will be extended until Jan. 10. The holiday display, featuring more than 7,000 miniature white lights along a half-mile of roadway, will be kept open a week longer to enable as many people as possible to visit the shrine and see the award-winning display.

The shrine's Way of Lights, which attracted more than 225,000 persons in December, will be open to the public from 5 to 10 p.m. daily through Sunday. The shrine is on Highway 460 between Belleville and East St. Louis.

Two Fined \$100, Costs

Herald G. Wallace, 21, of 2601 E. 24th St., and Charles Polach, 26, of 1321 Washington Ave., Madison, were charged with theft at 2:45 p.m. Thursday after three cases of beer were taken from a Jules Fischer Distributing Co. truck at 23rd Street and Madison Avenue. They pleaded guilty and were fined \$100 plus \$10 costs each. Polach was taken to the Madison County Jail.

DIRECTIONS FOR ECAS

Granite City Press-Record

By Paul G. Holbert, General Manager

With interest rates dropping and more funds available, a resurgence of home, apartment,

commercial and highway building is expected to help make 1971 a favorable year, tempered a bit by concern over a possible steel strike.

The anticipated national economic upturn can have a pronounced effect here, and increases in both federal and state spending are foreseen. U. S. and Illinois aid of 75% to 80% is available for a \$75 million Granite City secondary sewage treatment plant and interceptor sewer system.

Also adding to an optimistic outlook are the planned \$300 million metropolitan airport, rapid transit planning, the new Alton locks and dam, upgrading of Maryville Road and Johnson Road, and our location at the center of the U. S. population, in the heart of the Midwest and directly on all the nation's diverse air, water and transportation routes.

Challenges are numerous—

a downtown mall, new subdivisions and industrial parks, additional retail outlets, progress on the Great River Road and its proposed 12th St. connecting road, the Broadway underpass, conversion of the Army Depot to business or governmental use, resumption of SIU growth, cleaner air and water, rehabilitation of older homes, and a more accurate regional and national image of the Quad-Cities and Madison County as an excellent place to live, shop, play and work.

Stimulated by the You-Nited for Action community-wide progress planning, the 70th city anniversary-50th park anniversary-50th hospital anniversary in Granite City in 1971, the start of the new General Assembly session, important governmental elections, and the clear opportunities for achievement of this

18th Annual Forecast Edition

Granite City Steel Co.

By Nicholas P. Veeder, Chairman & Chief Executive Officer

Nineteen seventy was a year of galloping inflation for the American steel industry. Spiraling increases in the cost of virtually all supplies and materials—including essential bulk raw materials—and the cost of another round of wage increases and fringe benefit improvements limited the steel industry's earnings capacity.

So did increases in mill operating costs reflecting costly disruptions in production flow caused by third-quarter shortages of coal and coke and by the impact of two outside labor disputes—the truck strike early in the year and the auto strike near the end.

Increases in the price of finished steel mill products during 1970 did not balance out the spiraling increases in costs. Neither did the relatively high level of operations which some mills, including Granite City Steel, sustained most of 1970.

Our main problem in 1971 will be to hold costs more in line while supplying the reasonably good demand for steel which should prevail for, at least, the first half.

Many manufacturers and other steel users will be buying more steel than they are during that period to prepare for the possibility of a steel strike later in 1971.

We at Granite City Steel are doing everything possible to get off to a running start in 1971.

We have the best combination of production facilities in the company's history—although they are only valuable as long as they are maintained in good operating condition. This emphasizes the importance of carefully planned programs of preventive maintenance at our plant during the busy weeks and months ahead.

We have built a substantial inventory of in-process steel to strengthen production and shipping capabilities.

The order book indicates we will be shipping a normal, more profitable product mix for the first time since we completed our basic oxygen furnace plant, 20-inch hot strip mill and other new facilities.

We see 1971 as offering a real opportunity to build Granite City Steel's business, improve profits and maintain high-level employment at our plant, which is much the largest employer in the Quad City area.

Success in meeting those objectives will depend on our ability to produce a higher proportion of prime quality steel products during 1971 and a correspondingly lower proportion of secondary steel and scrap.

We will also have to continue the improvement in meeting delivery schedules on orders which began to develop late in 1970.

The Nestle Co.

By R. G. Schuessler, Plant Manager

Nestle has grown significantly in the past ten years, and expects to double sales once again by 1980.

Sales of Nestle, for example, outpaced sales of the closest competitor by a substantial margin, and are expected to make a significant contribution to the coming decade's success story.

Behind every line of products are imaginative and dedicated people, working as a team to achieve this kind of result. At Granite City, Nestle is particularly lucky in having a winning team.

At any manufacturing facility, people play the most important role, ensuring a smooth operation resulting in a steady supply of fine products to the sales organization.

The job we do at Granite City is particularly critical in this respect, since the product we produce is often shipped as far as the West Coast.

Americans are tea lovers, particularly theiced variety. Nestle views tea as fast achieving stature as the beverage of contemporary Americans. This means that we must continue to strive and fill the ever-increasing consumer demands for tea.

There are other important "products" at Granite City—the contributions, for example, that we make to a better community and a better life.

The Nestle family at Granite City has an impressive record in this regard.

We have set high standards for ourselves but it pays to have safety performance stands at 518 days of no lost-time accidents—the best in the industry and top performance in this area.

We are contributing daily to an improved environment

as well: long before environmental pollution received international attention, we recognized an obligation to protect and preserve the air, water and land resources around us.

Many hundreds of thousands of dollars have been invested at Granite City in research, new equipment and new facilities, and continuous planning and capital investment during the '70s will insure an ecologically sound environment.

We have many other achievements to look to with pride, particularly in our relationships with each other.

Success on the production line stems from success in communicating and responding to each other, as well as pride in what we are doing.

This attitude, I believe, has contributed significantly to the success of Nestle worldwide, and at Granite City.

Illinois Metro East Corp.

By Arnold Cassens, President

In 1971, the Illinois Metro East Corporation—an Illinois organization in which residents of the area from business, labor, government and education come together to work toward solutions to mutual problems and to develop their mutual potential—will hire an executive director.

It will continue to build on its solid foundation of area promotion and quality research reports, many developed in cooperation with local groups, into the industrial potential of the two Illinois counties of the St. Louis Metropolitan Area.

Currently, a committee of the Illinois Metro East Corp. is preparing a campaign to obtain the financial support necessary to hire an executive director; the committee's plans will be complete just after the first of the year.

The promotion of the bi-county area through the publications and the corporation will intensify next year.

The bi-monthly Metro East Report, which informs many people both in and out of the area of the character of the real Madison and St. Clair Counties, is now sent to nearly 6,000 people; over 7,000 people will receive it by the end of 1971.

Beginning in 1971, the weekly summary of area news, now broadcast every Friday over WUEM and other local stations, will be sent to nearly 300 business, labor and governmental leaders.

Through the corporation's research studies, a great deal has been found out about the bi-county area.

The locations of over 300 industrial sites of over 25,000 acres have been determined in the American Bottoms and their available transportation facilities and zoning noted.

The nature of nearly 400 manufacturing plants in Madison and St. Clair counties has been described in the Illinois Metro East Corporation's publication, "A Directory of Manufacturers."

Cooperation with interested local groups is one of the attributes of the Illinois Metro East Corp.

The industrial site map for southwestern Madison County was produced with the aid of the Tri-Cities Chamber of Commerce and the Tri-City Regional Port District, while a map of the utilities in this same area was printed with the help of the Tri-City Regional Port District.

The recently completed map of industrial sites in western St. Clair and Monroe Counties was prepared in cooperation with the Southwest Regional Port District.

The projected industrial map for eastern St. Clair County will be produced with the aid of the Belleville Industrial Development Corporation.

The corporation plans a number of research reports for next year.

In addition to the map of industrial sites in greater Belleville, the Illinois Metro East Corp. will expand its published report on industrial parks in the two counties, which includes the Stephen Macraes Industrial Park; print a description of the fine arts and higher education in the two counties, and summarize the Southwestern Illinois Metropolitan Area Planning Commission land use and transportation plan for Madison and St. Clair Counties.

Madison County Farm Advisor

By Warren W. Bundy, Cooperative Extension Service Advisor

Corn production suffered a severe blow from corn blight disease locally as well as in most of the corn belt and southern states this year. Corn borers, cutworms, sea beetles and drought also reduced corn yields here.

Official corn yield estimates are not available for Madison County, but the yield likely will be 20% to 30% lower than our 1969 county average of 70 bushels per acre.

Higher prices for corn and soybeans will make up much of the loss to grain farmers from the lower corn yield.

Illinois farmers received \$1.32 a bushel for corn on Nov. 15, 1970, compared to \$1.07 a bushel on the same date in 1969. Soybeans brought Illinois farmers \$2.59 on Nov. 15, 1970, compared with \$2.31 on that date in 1969.

Livestock producers are under profit pressure. Feed is a major cost item in livestock production, and feed costs are higher. Corn quality is lower, and feed conversion efficiency is lower.

Hot prices are \$9 a hundred pounds lower than a year ago. Eggs bring farmers 33 cents a dozen, 10 cents lower than a year ago. Prices received by farmers for beef cattle, calves, lambs and milk are about the same as a year ago.

With higher feed costs and lower feed conversion efficiency due to lower corn quality—and with livestock prices the same to lower—livestock producers will have problems showing a profit.

Corn blight is a fungus disease which caused premature killing of corn plants, weakened corn stalks, and some rotting of grain before harvest.

About 90% of the corn grown in 1970 was susceptible to corn blight, and about 75% of the corn planted next year will be susceptible to the disease.

In 1972, there will be enough seed available which is blight-resistant to eliminate the corn blight problem.

The farmers' share of the retail food dollar was 41 cents in 1969, compared with 47 cents in 1960.

Many farmers believe someone other than farmers receives the major economic benefits from improved agricultural technology and farm production practices.

Environmental quality is an important topic. Agriculture makes some contribution to environmental problems. Silt, animal waste disposal, and agricultural chemicals represent potential—and sometimes real—pollution problems.

Continued efforts are being made by farmers in using conservation practices and tillage methods to reduce soil problems which are costly to farmers and to the general public.

Farmers are using better methods of treating animal manure for its proper disposal, but we still need more research

for better answers than we have now. We need to know more about how to get livestock wastes on the fields without causing odor and runoff problems.

Agricultural chemicals is a topic about which some people become emotional. Knowledgeable people do not dispute the need for agricultural chemicals such as fertilizers, insecticides, fungicides, herbicides and others. Such people recognize, however, that potential and sometimes real problems exist.

Some problems already have been eliminated, and the changes already made in agricultural practices to reduce pollution problems are too many to list here.

More changes will be made as we find better answers to agricultural problems. But even with our present limited knowledge, we recognize there are limits beyond which we must not go.

One other concern of several Madison County farmers is the possible location of a new airport close to them.

Regardless of where the airport is located, it will take a lot of farm land and result in the loss to relocate many farm families.

Livestock producers have raised questions about the effect of noise from low-flying aircraft on animals and on livestock production efficiency if an airport is located near their farms.

To conclude on a brighter note, family-sized commercial farms operated with good management will stay in business. Such farms will provide farm families a standard of living comparable to people living in the city. And the farm families will continue to make important contributions to the local economy and community life.

Farmers will continue to produce an abundance of high quality food and raw products for the market.

Continued efforts are being made by farmers in using conservation practices and tillage methods to reduce soil problems which are costly to farmers and to the general public.

Farmers are using better methods of treating animal manure for its proper disposal, but we still need more research

Nichols Net & Twine Co.

By William F. Nichols, President

In forecasting for 1971, we can see only one advance in all business, as the economy is still advancing as the population expands.

With a lowering of the prime rate, we have seen stocks advance purely on anticipation only of growth in the economy, as the financial quarterly reports certainly give no good news to cause advances.

Our local economy will expand tremendously if the new airport is located in Madison County. And with the new state and Interstate road construction, new business is certainly assured, provided we can furnish clean air and water and good sewage disposal and drainage to the residents.

The only drawback on the horizon that I can see at the present is the inflation question.

If some sort of control is put on both business and wages, I believe we will price ourselves out of the world market, and so inflate the economy that a severe recession will result. We are, at present, very close to this point.

I think our crime situation has improved a great deal as far as the police work is concerned. But the severity of the penalties handed down in our courts has much to be desired.

All in all, however, I still have great faith in the United States, and its people, and would still put my faith in a good year in 1971 for all concerned.

Granite City Trust & Savings Bank

By Ernest A. Karandjoff, President

Last year, we stated that the decade of the 1970s would be one of challenge and opportunity. This year of 1970 has certainly lived up to this forecast and in addition has been one of frustration as well.

Frustrating—in the sense that inflation has continued with little abatement, leading to a constant effort on the part of all of us to keep our income equal to our outgo.

All of our time-tried rules of economics to restrain inflation have been employed with little discernible result.

There is no good prospect of halting the steady rise of prices unless we find skill and imagination to handle our economic future.

Meanwhile, a steady reduction of interest rates is taking place which will hopefully lure industry to expand and grow. A particularly weak part of our local situation is the low rate of growth for us and we have been pleased for the opportunity to increase our contribution to the welfare of the community.

Our pledge is to render the best banking service available anywhere. We constantly strive to meet this goal and the year of 1971 will be no exception.

The coming year should be a better one for all of us.

Trust and Savings Bank have just celebrated our 60th year of service to our community.

This has been another record year of growth for us and we have been pleased for the opportunity to increase our contribution to the welfare of the community.

Our pledge is to render the best banking service available anywhere. We constantly strive to meet this goal and the year of 1971 will be no exception.

The coming year should be a better one for all of us.

We here at Granite City

Nesco Steel Barrel Co.

By Thomas M. Stinson, President

The year 1970 was a very good one for some and a very bad one for others. It depended on what business you were in.

One way the year of 1971 can improve over 1970 is by increased productivity and demand—with selling prices commensurate with the inflationary high cost of raw materials, services, transportation and labor.

Productivity is the vulgar vein of all industry and profitable sales must be realized to offset high cost.

We are hopefully optimistic that both will be accelerated and the economy of the country will begin to show improvement.

If this takes place, we are corded as a satisfactory year sure the year of 1971 will be re-

for industry.

REVIEW

Metropolitan Area Airport Authority

By Howard W. Kaseberg, Board Member

The St. Louis Metropolitan Area Airport Authority was announced by Governor Richard B. Ogilvie on Aug. 26, 1970. The five-man board, of which I am a member, was charged with the responsibility of planning and implementing the construction of a second major air carrier airport for the St. Louis Metropolitan area.

While we were admonished to proceed with all possible speed, it was anticipated that such a vast project would take approximately ten years to complete. Under the capable leadership of our chairman, Robert B. Lamkin, and the active interest of the members of the authority, several important steps have already been taken.

Most significant of these was the selection of Arven H. Saunders to be the executive director of the Authority.

Mr. Saunders comes to us with a rich background

of experience in airport building and management, and his appointment will, doubtless, prove to be a significant first major step toward the accomplishment of our giant task.

Other accomplishments during the first four months of our existence have been:

Securing the services of Ernst & Ernst, a nationally recognized auditing firm, to set up and audit our financial record.

Awarding of a contract to an engineering firm for a preliminary study of factors needed by us for a final site selection.

And, finally, the setting up of an office in the local area from which to conduct our preliminary operations.

It is anticipated that during the early months of 1971, a final site selection will be made, and that we can then proceed with land acquisition.

No matter where the airport is finally located, the economic impact upon all of the east side communities and the entire metropolitan St. Louis area will be greater than that generated by any project in the entire history of the area.

The \$350,000,000 estimated cost is only the beginning.

It is not inconceivable that the construction of this huge jetport will generate the need for an entire new city, with an intermodal freight complex to facilitate the rapid transfer of cargo and passengers from one mode of transportation to another.

Transportation experts are forecasting that, with the determination of St. Clair County as the geographical population center of the United States, this air terminal could well become the international air center of this great nation.

The economic possibilities and the resulting impact on this metropolitan area provided by such a development are little less than fantastic.

The development of such a project, however, will require a team action on the part of all citizens.

A sincere effort should be made by all segments of our metropolitan community to grow together for the greatest good fortune to all concerned.

Let us not defer or neglect this once-in-a-lifetime opportunity for whole community progress.

At this time, we see little hope of acquiring sufficient natural gas to make it available to all customers during 1971.

In order to accommodate the expected electrical growth in our area, our forces will be quite busy making line extensions and increasing substation capacities during 1971.

This includes building major transmission lines of 345,000 volts into the area, to assure the availability of power as needed by our customers. Lines of lesser voltages will also be required to render this service.

Since natural gas is somewhat restricted, we will probably concentrate to a great extent on replacing and rebuilding some of our gas mains.

The highway freeze imposed for several years on Madison and St. Clair Counties has been lifted, but anticipated major construction has not yet occurred. Hopefully, this will be remedied during early 1971.

Commercial development, especially in the downtown Granite City complex, has shown little signs of activity. It is hoped that the plans for the "mail" will become a reality during 1971 to revitalize this shopping district.

Industrial growth has been primarily confined to the Madison Industrial Park, although the Tri-Cities Regional Port District has made some progress, as well as the recent addition of the Chemico plant north of Mitchell.

I believe 1971 will bring with it a more stimulated economy. However, if the Tri-Cities area is to obtain its fair share of this growth, there must be greater cooperation and effort put forth by all citizens, organizations and governing bodies in the community.

Illinois Power Co.

By Carl E. Mathias, Service Area Manager

There has been considerable publicity during 1970 about problems confronting utilities throughout the nation.

In some instances, it was necessary to curtail electric consumption due to a lack of generating capacity. This has not been the case for customers of Illinois Power Co.

In our last report, we indicated that a 600,000 kilowatt unit was scheduled to be in production in June of 1970 at our new Baldwin Power Plant. This schedule was maintained.

We also installed peaking units with 100,000 kw capacity at Stalling. This installation was completed during 1970.

Additional peaking units of 70,000 kw were installed in the northern part of the state at Ogleby.

Our next generating unit of 600,000 kw is scheduled for completion in 1973 at the Baldwin Power Plant.

A third unit of similar capacity has been ordered, although the site has not yet been established. This unit is scheduled for completion in 1975.

Our 1970 summer peak demand was 1,813,360 kw, which is an increase of 3.1% over 1969. We had generating capacities in 1970 of 2,004,000 kw at five major power plants — Havana, Wood River, Vermilion, Hennepin and Baldwin — plus peaking facilities at other sites of 193,300 kw.

We anticipate continued growth by our electrical customers, which will require for in our planned generating capacity installation as outlined; this should assure an ample supply of electricity.

The year 1970 has also seen major accomplishments by our company toward pollution abatement.

The generating units at Baldwin are being installed with the most modern pre-pollutants available.

This same modern precipitation equipment was installed on our largest unit at the Wood River Power Station.

Plans are under development for the installation of an additional pollution control device on yet another generating unit at the Wood River Power Station.

This device will include a precipitator to remove 99.7% of the particulate matter and will also be the nation's first commercial unit for removing sulfur oxides from stack emissions and converting them to marketable sulfur.

Fuel supplies of all forms are of national concern. The supply of coal for generating units has become a problem for some utilities, although Illinois Power has not experienced this problem, nor do we expect it to occur.

Oil is also in scarce supply and at least some industries are having difficulty arranging for an ample supply to operate their equipment.

The limited availability of natural gas has now become well known to our customers, since it has become necessary to restrict service to some of our largest customers, desiring it.

We have made every effort to obtain additional supplies and will continue to do so.

Granite City Board of Realtors

By Everett G. Steele, President

Nineteen seventy-one promises to be a year of improved and increasing real estate activity in the Quad-Cities. For the individual prospective home buyer, I believe 1971 will offer an excellent and unparalleled opportunity in which to buy a home.

Most of us remember that a new home could be bought back in 1948 for \$6500. Following World War II and a period of slow real estate activity.

That same home today is worth approximately \$14,000.

In like manner, I predict that a home bought in 1971 for \$20,000 will be worth \$30,000 within the next 10 years.

Let me explain why I make this prediction.

First of all, home values and prices are lower now than they are expected to be in a long time.

While the prices of most consumer products have rapidly increased in the past several years, home values have held relatively stable, due to a sluggish demand and a shortage of mortgage financing.

For these same reasons, lumber, a basic product in new home construction, has held relatively stable. A "2x4" board, for instance, costs the same today as it did five years ago.

However, this situation is expected to change considerably. The demand for housing is expected to be felt increasingly during the coming year.

As this demand and volume increases, the price of homes, which has lagged behind other products during the inflationary period, will surely increase.

As Preston Martin, chairman of the Federal Home Loan Bank, recently stated, "Every month the potential home buyer waits, a new house will cost him another one percent." This means that building costs are expected to increase.

Investment in land remains a smart buy; when God made the world, He made all the land He was going to make, but He didn't make all the people.

Just as with automobiles, where the recent trend has been to economical, basic-transportation models such as the Maverick, Gremlin and similar types, so it is in the real estate field.

The recent trend in new homes has been for basic shelter, with the buyer wanting as much living area for the dollar as possible, without the frills such as built-ins or dishwashers—which were in such strong demand a few years ago.

Home ownership has been one of the great bulwarks of our community and nation. It provides the security, independence and pride of ownership which is the foundation of family living.

Many home owners have seen their \$1000 savings, invested as down payment, grow into a \$3000 or \$4000 equity in their home in a few short years...all the while providing the shelter, privacy and contentment upon which they depend.

The year 1971 will afford an excellent opportunity for many families to make home ownership a reality.

The community in which we live and work is where we feel the pulse of our nation's economy and how it affects us daily. People are taking more and more time to be certain the things they purchase are of the highest quality and value.

The last few years have seen the tightening in consumer buying. Non-essential items are where the volume is lower than last year. This could be healthy and a sign of a leveling-off.

From the manufacturers of our products in the last six months, we have received smaller and less frequent price increases. Needless to say, freight rates have risen, adding to the cost of the products.

A serious problem in the automotive body repair business that some insurance companies using company-owned drive-in claim services. This could take away the right of repair to the consumer and to the body shop.

We are looking forward to 1971 as a sound step ahead with more volume and less unemployment, partly due to the expected home and apartment building.

Southwestern Illinois Area Planning Commission

By Henry D. Karandjeff, President

The primary responsibility of the Southwestern Illinois Metropolitan Area Planning Commission is to produce a comprehensive plan for the three-county region of Madison, St. Clair and Mason Counties.

In December of 1969, the Commission published the land use and transportation elements of the regional plan under the title of "Madison County Plan" and "St. Clair County Plan."

These documents are the result of extensive research and analysis of population and economic trends as well as trends in land use development, transportation facilities and urban services such as water and sewer facilities.

Since the publication of the plan documents, a number of development factors have been the subject of public discussion. These factors will have a distinct impact on the entire region, including the Quad-Cities.

Perhaps the most significant is the proposal for a second metropolitan airport in Illinois to be developed jointly by the state of Illinois and the city of St. Louis.

The primary impact of such a facility could be to accelerate the trend of new development in the metro-east area.

The airport would act as a magnet, establishing a major focal point of economic activity and urban development to the east of downtown St. Louis.

Since the future of the Quad-Cities is closely tied to that of downtown St. Louis, shifting the transport focal point of the metropolitan region will have a beneficial impact on the Quad-Cities, in that it can become an interconnector.

Although a site for the second metropolitan airport has not been selected, preliminary discussions of the proposal indicate the intention to obtain a large parcel of land, roughly 30,000 acres, and to insure compatibility with adjacent land uses.

It is anticipated that planning and construction will take about 10 years.

Hopefully, by the early 1980s, the St. Louis metropolitan area will have at least one major construction on a total rapid transit system, and a line would serve the new air facility.

These proposed facilities present a unique opportunity to structure growth and redevelopment of the region.

The proposal to construct a rapid transit system in the region also offers a unique opportunity for urban redevelopment, such as the Quad-Cities to restructure and redevelop communities.

It should be stressed that, in designing a total system of rapid transit corridors, we should attempt to serve not only the existing urbanized areas, but also those areas in our region which are especially suited for further urban development.

Rapid transit stops in the Quad-Cities area would offer unique possibilities in redevelopment, reuse and greater intensity of use for commercial and higher density residential areas.

Recent concern about ecological values also offers an opportunity for bringing the problem into focus at home.

The state of Illinois is presently in the process of purchasing Horseshoe Lake to the east of the Quad-Cities.

The commitment on the part of the state to this local interest, could result in a highly attractive regional park facility.

In concert with the East-West Gateway Coordinating Council, the Commission is carrying out a housing study which includes an overview inventory of housing stock, plus evaluation and projection of means to provide improved housing for all citizens in the area.

It is believed that one of the most successful programs carried out by the Commission, and one which is being continued this year, is the Technical Assistance and Planning program (TAPPS), providing planning services to municipalities which require assistance on short notice and for a wide range of purposes.

The program is structured and operated to provide technical assistance in the decision-making procedure on a day-to-day basis. There were 24 defined programs and, in addition, numerous others where the cost was less than \$500. The Commission is planning to continue this program and to expand it as necessary to meet the needs of the municipalities in the region.

As part of this program, the Commission assists the local government units in applications for state or federal funding assistance, with zoning or subdivision problems or studies and with day-to-day planning problems.

During the 1968-1970 fiscal year, the staff reviewed approximately 30 applications amounting to nearly \$80 million of requested grants for such varied projects as highways, water-sewer systems, and recreation land purchase.

The staff has also been working very closely with the Gateway Council staff in developing the portion of the regional plan which affects our area.

It is our purpose to emphasize working with our county and city officials in the three counties and implementing our planning with information concerning availability of funds from the multiplicity of federal agencies.

In this manner, it will be possible to obtain greater results so that the plans we have prepared for these municipalities will be put into effect.

It is our purpose to emphasize working with our county and city officials in the three counties and implementing our planning with information concerning availability of funds from the multiplicity of federal agencies.

In this manner, it will be possible to obtain greater results so that the plans we have prepared for these municipalities will be put into effect.

Madison Metal Decorating Co.

By Rhoderick W. Key, President

The year 1970 has been a good year for Madison Metal Decorating Co.

Profits, of course, were not as high as anticipated due to increased labor, material and operating costs. In order to remain competitive and to maintain economical capacity levels, we passed on a minimum of these increased costs to our customers.

This was our first full year of operations in our new facilities and sales, as expected, increased favorably as did our employment.

We look forward to 1971 with greater expectations — based upon our current order backlog, coupled with the wide and diverse clientele that we serve.

Stephen Maeras Industrial Park

By Mike Saszyk, Mayor, City of Madison

The forecast for 1971 consists of a multitude of question marks for municipalities, for industry and also for labor.

The city of Madison, which owns the Stephen Maeras Industrial Park, looks for 1971 to be a year for continued growth and development.

In 1970, Brendel Distributing Co. built a building for about \$200,000 and is now operating. Swift and Co. are in the process of building a building for about \$250,000 and it should be completed soon.

For 1971, Caine Steel Co. is now negotiating for an addition to its building for about \$500,000. This plant should add about 35 employees to its growing industrial park payroll.

Many cities are caught in a fiscal vise between rising expenditures and limited revenue sources.

The city of Madison and other cities must look for new revenue sources. The big problems grow larger every year, but the array of solutions is improving. We must have increased citizen participation in government management.

The city is still receiving inquiries on our industrial park but the city is being more selective because we are seeking increased revenue for our city. Madison is facing up to the challenges of 1971, challenges that we recognize are related to problems of growth, planned development and environmental change.

The administration is optimistic that 1971 will be the year to complete our industrial park.

to problems of growth, planned development and environmental change.

The administration is optimistic that 1971 will be the year to complete our industrial park.

Granite City Glass Co.

By Donald G. Adams, President

City in 1970 was not bad. We completed a 25,000 square-foot addition to the west end of our plant early in the year.

This new building contributed to the most orderly and highly successful major model changeover ever accomplished at this plant.

All of our employees are to be congratulated for a job well done.

The outlook for the automotive industry in total for 1971 is forecast to be significantly better than the year just ended.

The market is probably undervalued for the last two years and a substantial recovery is due once the economic climate turns favorable.

In addition, volume for at least the first quarter should proceed at a brisk pace as an effort is made to recoup sales deferred due to the General Motors strike.

We are looking forward to a year of at least partial recovery from 1970, with renewed emphasis on performance, competition, and the evermore important factor of quality.

The community in which we live and work is where we feel the pulse of our nation's economy and how it affects us daily. People are taking more and more time to be certain the things they purchase are of the highest quality and value.

The last few years have seen the tightening in consumer buying. Non-essential items are where the volume is lower than last year. This could be healthy and a sign of a leveling-off.

DIRECTIONS FOR A SUCCESSFUL YEAR

Madison County Federal Savings & Loan Association

By Albert H. Froemling, President

Considering the national economy as a whole, we, at Madison County Federal, feel that the year 1970 has been a reasonably successful one.

The year 1971, however, shows promise of increased activity both at the savings window and home loan activity.

The tight money market which has been with us throughout 1970 and part of 1969, with sustained high interest rates in the bond market, proved to be unusually keen competition for the savings dollar.

The short-term interest rates have softened considerably and the prospect of increased savings flow into financial institutions shows great promise. Among financial institutions, competition for dollars will continue, however.

The Federal Reserve Board is apparently intent on loosening up on money, to the extent that it will spur the economy but try to keep inflation in check.

So far, the effort to stem the tide of inflation has been somewhat less successful than was hoped for. As a result, we may see some measure of wage and price control during 1971. Perhaps this may take place in the form of threats of controls or "jawboning."

Unless some measure is taken to stabilize currency, inflation could move ahead still more and interest rates would again spiral.

Money for mortgage loans will become more plentiful

In 1971, the cost of this money will remain relatively high, since the money which sustains this market is still costly. There will be some slight reduction in the cost of mortgage money brought on by competitive pressures.

Housing starts for 1971 will probably measure 1,700,000 units and housing appears to be off to a good start. Since the government is committed to the concept of more and better housing, it appears that money supplies for this commodity will be plentiful.

To the extent that the usual flows of savings are insufficient, the Federal Home Loan Bank

has created a secondary mortgage market which will purchase both insured and conventional loans, thereby in effect guaranteeing that money is available for new loans.

A large volume of housing, possibly as much as one-third, will carry with it some form of government subsidy.

Much of the latter type housing will be in the form of pre-fab or modular homes, substantially created in factories.

With rising labor costs, lower and medium-priced homes to a large extent will be of this type, as against on-site construction.

We expect that a number of this type will be built in our market area. And in the interest of serving this community's needs, we plan to offer financing of this type.

The past year saw the conversion of our savings and mortgage records to computerized accounting. This step will provide us with the tools to provide greater and better service to our customers.

Because of governmental control and supervision of the savings and loan industry, our outlook for 1971 is necessarily based on national issues.

As it looks now, there will be increased federal aid to housing, which will boost the economy, especially in the last half of the new year.

All factors considered, we look forward to a reasonably good year in 1971.

Tri-City Regional Port District

By Harold R. Fischer, Chairman

Even though forecasting in toto is highly problematical, that derby is again in full swing. Because of the many factors of uncertainty affecting each individual's idea on the economy for next year, the predictions are many and varied.

The economic downturn during the first part of 1970 has remained more or less stationary in the past few months and, it now appears, is poised for a vigorous upturn.

I doubt the turnaround, at least on a national basis, will occur until at least the third and maybe the fourth quarter of 1971.

The most damaging, delaying factor in any change for betterment was the recent General Motors strike that brought the national economy to a halt.

When it is settled, in all its far-reaching ramifications, the effort that will push automobile production even higher than before the strike began.

With that production plus the reinforcements that are appearing in headlines out of Washington, we need not expect an immediate boom, but CHANGES may well serve to gradually brighten the national mood.

Unemployment in 1970 has increased slightly. In the immediate future, as more soldiers are released to return to civilian life, unemployment will continue to increase.

A major downturn in the economy need not be expected. But, likewise, a rapid, substantial increase is not in the picture for the immediate future.

Savings in the financial organizations clearly indicate that there is large unused cash power which, when prices are right and the need fully determined, will be converted from "want" to expanded economy.

At the Tri-City Regional Port District, there is real justification for optimism.

The new warehouse being constructed on the Port property is now in use by the owner-operator, The Bulk Service Corp. Although not completed, it is being used and should be in full use within 30 days.

The operation of that corporation during the past year has substantially increased tonnage across the dock.

Its facilities enable users, buyers and sellers, in a 100-mile radius of the Port, to handle products more economically and competitively.

As the increase in employees at the Port will be negligible, the economic impact will be far-reaching.

Plans are being formulated for the construction of additional dock and another warehouse for other types of commodities.

Funds have just been allocated for a major improvement in the county and entrance roads between Federal Highway 151 and the Port office. This work should be completed by early spring.

Port Manager Carl Ranft, who is negotiating with other national concerns for further uses of Port property, hopes to have an important announcement on developments in the near future.

The recent announcement by Kelly Tar & Chemical Corp. of their plans to expand their production facilities 50% more

extensively enhances that organization in this community. It will put additional people to work, both in construction and, later, in operation of the expanded facilities—another plus for this area.

The Federal Reserve System and our national government are striving to improve the economy without creating more than a very normal inflation.

By 1971 normal, I am confident we will see some betterment. Interest rates have started to drop—money is plentiful—and the need exists.

An upturn should develop, but the picture will be modest when compared to the recoveries from previous recessions.

Some further reduction in business capital outlays will temporarily limit the expansion.

The Tri-City area has always been tied closely with the national economy. Bove in my estimation, the expansion of the local economy and area development should improve somewhat more rapidly than nationally and 1971 should economically in the Illinois metro area be better than 1970.

Miles Laboratories, Inc.—Marshall Division

By B. J. Hunter, Vice-President Union Milling Operations

The Union and Marshall Divisions of Miles Laboratories, Inc., were merged Sept. 28 to create a new Marshall Division—a single, more efficient manufacturing and marketing force with diverse capabilities in the food processing industry.

This combination, under a single management structure, was effected to make optimum use of all the resources previously available to the separate divisions and has provided us with an extremely sound basis for growth in the 1970s.

The Granite City operation is now a major part of Marshall Division, which is headquartered in Elkhart, Ind.

The merger combines the former Union Division's experience in the manufacture of corn syrup, corn starch, caramel colors and citric acid with present capabilities in the areas of dairy product ingredients, enzymes and organic chemicals provided by plants in Elkhart, Ind., Madison, Wis., Clifton, N.J., and Zealand, Mich., plus a strong export and international operation.

In effect, the merger brings together acknowledged leaders in their respective fields to form an organization with extensive experience in the food ingredient field.

The merger resulted in the following promotions and transfers within the corporation:

J. S. M. Dashwood was elected by the board of directors of Miles Laboratories, Inc., to the position of corporate vice-president.

In the Marshall Division, R. J. McGrath was appointed vice-president-marketing, Gerald Ulfery was appointed controller and J. P. Casey was named vice-president and director of research.

While the Marshall Division offices are located in Elkhart, we will continue to maintain a complete operating facility in Granite City.

with our research, sales and production staffs.

We were pleased that production was at near-capacity during 1970, on an around-the-clock, seven-day-a-week basis for most of 1970.

Our Granite City operation contributes significantly to the city's economic picture with close to 500 plant and management employees and a total payroll of more than \$5 million.

The sales outlook for 1971 appears to be sound.

As with most segments of the nation's industrial economy, next year's performance will be based, to a large extent, on the ability of business to make the best use of its existing production capabilities, personnel, facilities and capital assets.

In Elkhart, and here in Granite City, Marshall Division management has recognized the probability of increased costs of raw materials and supplies.

There will be increased demand for corporate attention to the problems of environmental control.

There will be increased competitive pressure within our own industry because of greater technical know-how, better equipment and the availability of talented people.

This has created a challenge for the 1970s for industry throughout the nation.

Here in Granite City, it means that our management must manage better, workers must produce more efficiently, salesmen must sell more and all must do a better job of serving our customers.

Together, this will enable us to offer a better product at a reasonable cost, and still provide margin for profit.

We have recognized that 1971 is the year to improve our operation so that we can become an even more competitive factor in the marketplace. We have been encouraged in the last quarter of 1970 by the response of our people to this challenge. They have recognized the job that has to be done and have set about doing it.

We expect that there may be some obstacles in 1971. We also believe that we are better equipped than ever before to deal with them. In part, this is due to the streamlined divisional organization, which gives us new capabilities in many areas, such as marketing, production and product development.

In part, it's also due to the cooperation of our Granite City employees, whose experience and dedication has helped us through this reorganization and will enable us to improve our operations and continue our progress and growth.

The Marshall Division in Elkhart and in Granite City is confident that we will be able to solve whatever problems might arise in 1971 and still emerge a stronger operation—capable of accelerated growth and progress.

Chamber of Commerce of the Tri-Cities

By Albert H. Froemling, President

The Chamber of Commerce of the Tri-Cities has completed a successful year, one that was not without its trials and challenges.

The most serious development that threatened the area was the news that the Granite City Army Depot is scheduled for deactivation. This news caused concern to all area residents. The final outcome of this move is still somewhat of a question mark.

The truth remains, however, that physically, this parcel of ground presents either a reuse for a government facility or, alternatively, an ideal spot for industrial development.

Final closing of the Depot should occur during midyear 1971, and how this choice acreage will be utilized either a reuse for a government facility or, alternatively, an ideal spot for industrial development.

Final closing of the Depot should occur during midyear 1971, and how this choice acreage will be utilized either a reuse for a government facility or, alternatively, an ideal spot for industrial development.

If it can be put to use in some constructive, tax-based, industrial enterprise, the area overall would benefit.

The accreditation program of the Chamber, which was undertaken during this past year, is ready for presentation to the Chamber of Commerce of the United States for final review. It is hoped that in 1971 we will receive certification as an accredited Chamber of Commerce.

The resignation of our Chamber manager, Howard Colquitt, who will be missed by his many friends in the area, gives rise to the task of hiring a new executive. Hopefully this can be accomplished in the early part of 1971.

Just as Mr. Colquitt takes with him new ideas and experience gained in the Tri-Cities to his new location in Tempe, Ariz., so a new manager will no doubt bring with him new ideas, programs and experience gained elsewhere.

The year 1971 will unveil a new work program in the form of VOLUNTARY ACTION which was adopted by the Chamber board of directors.

It will endeavor to enlist help from outside of the Chamber membership to plan improvements for better community life. This program should prove exciting as well as challenging.

The prospect of an east-side major airport will do much to

spur the economy of the Illinois side of the river, especially once the location is named.

Site determination, it appears, will be announced during 1971, and if it locates somewhere near the Tri-Cities the influx of new activity and growth will be felt in our own market area.

The Youth Committee of the Chamber has experienced an excellent year and we look for even greater benefits from this activity.

The fine young high school students associated with this group will spread their influence among fellow students in their understanding of the work being carried on in the business community.

In siding up the economic outlook for the area, there are certainly many "ifs" to be considered.

If inflation is slowed up somewhat, investor and consumer confidence will be restored and the market place will become somewhat more normal. Likewise, if military expenditures are reduced, more dollars will be available for coping with needs on the homefront.

As a whole, the economy of the area will improve slowly during the first two quarters of 1971 with a more rapid recovery during the last half of the year.

The Chamber of Commerce of the Tri-Cities will be ever alert in ways in which it can aid in improving the economy.

Efforts to increase the supply of money have brought about a substantial lowering of interest rates but have had no effect on the unemployment picture.

Business generally seems to be waiting for a clearer indication of governmental policy and attitude before proceeding with plans for new plants and equipment.

Work stoppages, primarily the General Motors strike, which resulted in the temporary closing of A. O. Smith plant, contributed to the local drop in business.

I believe we can take a more optimistic view of prospects for business in 1971.

With an increase in the supply of mortgage money, local home building should show some improvement.

And the anticipated upturn in business nationally will help our local industries and enable them to increase their work and production. This will in turn help our retail business.

Summing up, it is my belief that, due partly to the fact that our major en-

vironmental problems are being solved, the economy will be better than 1970.

Associated Retailers & Civic Association

By Arnold Fleishman, President

Sales in 1970 were a reflection of inflation and other domestic problems. They would have been better had these conditions not existed.

The people of the Tri-Cities can now look with pride at their merchants for giving them a better choice of consumer products.

Today, the average consumer is better educated and more modernized. Therefore, with new fabrics and styles developing, the merchants must be ready to present these to the people.

We are striving to improve our services and choice of merchandise.

To supply the consumers in the Tri-Cities with the best in shopping facilities, this must be done.

J. P. Casey was named vice-president and director of research.

Downtown Granite City Development Committee

By Henry R. Gabriel, Chairman

This committee was established by the Tri-Cities Chamber of Commerce to assist in the general improvement of the "downtown" area of Granite City in any way possible.

The ultimate goal would be to make our downtown into a shopping center that would be both convenient and enjoyable for the citizens of our community.

Several donations have been made by business leaders in our community which permitted the committee to hire a planning consultant. Several basic plans were developed. The committee approved the plan it thought most beneficial to the community.

All plans were submitted to the City Council and the council unanimously voted to accept the plan approved by the

committee, and urged that the downtown area be improved. The plan that has been approved includes a two-

block area of Niedringhaus Ave. that will be converted into a mall with parking, lawn areas and trees. It also includes three blocks of 19th St. that will be used as a semi-mall with grass areas and trees on this street.

Our goal for completion of the mall and semi-mall is some time in the summer or fall of 1971.

The committee and the City Council, with the help of the downtown business people, can make our downtown a better place to shop.

I would like to urge all citizens of our community to express their feelings as to the desirability of making our downtown into a better place to shop—a shopping center with adequate parking, traffic patterns and good environment.

The plan that has been approved includes a two-

REVIEW & FORECAST

G. H. Sternberg & Co.

By G. H. Sternberg, President

Highway construction seems to be the one truly bright spot in the 1971 construction activity picture for our immediate area.

Route 203 from Granite City to Mitchell should be part of an early 1971 letting. Our Interstate and primary urban construction throughout District 8 — the area which has a direct effect on contractors and craftsmen in the Tri-Cities — could exceed any fiscal year expenditure of the past.

Interstate work will probably be limited only by the availability of qualified, interested contractors. Work on primary urban routes could easily triple previous recent yearly expenditures.

Negotiations with various government agencies necessary to allow continuation of Route 151 past the Granite City Army Depot are being aggressively pressed, but construction activity in the highway extension prior to 1972 seems unlikely.

The painfully slow progress on the Venice underpass project should be speeded up soon to make that long awaited improvement ready for use in late 1971.

Industrial activity in major replacement of facilities or installation of new facilities will be sharply off from any of the years of the recession.

Using existing facilities in a profitable way will call for the full attention of industrialists to the extent of most major capital expenditures.

Aside from the large school complex at Maryville Road and Rte. 203 scheduled for beginning in the early second quarter of 1971, institutional construction will be confined to relatively minor items plus completion of the local hospital expansion and the rebuilding of the fire-damaged high school.

Some gratifying increase in housing starts, of moderate quality and multi-unit character, seems to be in the cards for late second-quarter or early third-quarter construction. Zoning and annexation procedures may prove a deterrent to these proposed or firmly planned efforts.

Additional governmental support of housing and environmental improvement facilities seems to be the only factor that could beneficially change the overall outlook for construction activity in the Tri-Cities.

Laclede Steel Co.

By Paul B. Akin, President

In my letter to the Granite City Press-Record last Jan. 5, 1970, I remarked about the international steel shortage that was effecting our business.

The steel shortage continued through the first half of 1969, and then stopped as suddenly as it had started 15 months before.

A year ago, I failed to recognize, however, what a tremendous impact the steel shortage would have on the price of ferrous scrap.

From January of 1969 through August of 1970, almost half of the prime scrap in the United States market was exported.

Laclede depends entirely on scrap to make steel in its furnaces at Alton. In January of 1970 scrap prices for prime grades jumped 40% to 75% above year earlier prices.

As a result of the scrap price increases, Laclede has been forced to pay approximately \$7,000,000 more for scrap in 1970 than in 1969.

Fortunately, Laclede's operations and our new equipment have continued to improve significantly throughout the year, and we have been able to offset some of the added scrap costs.

In 1971, we anticipate heavy business in the first half of the year and a slower pace in the second half.

Annette Pattern Co.

By Dale Annette, President

In the pattern business, we are developing new product lines in automotive, tractor, farm machinery and railroads.

The new product development is very low, and this means a static business condition instead of expansion.

We are now running on old product lines by way of replacements or changes, with very little as a result of new programs.

When there are very few new programs and we run on old product lines, the competition is greater than in times of good business. Therefore, it is a lot harder to keep some business to keep people employed.

Until we see some new product development, the business picture will remain about the way it is now.

Southern Illinois University

By Dr. John S. Rendleman, Chancellor

The world of 1971 is more out of focus than those 365-day packages that have constituted living in the past.

That lack of sharpness demands more from all segments of our society, including the university community and especially Southern Illinois University at Edwardsville.

We are turning the corner on more than a new day and year in higher education in Illinois.

The university and the public have in some respects exchanged vantage points. Not more than a decade ago, the public held universities apart and felt events of the campus were not part of their daily lives.

By the same token, most university communities ten years ago were remaining aloof from the problems, goals and aspirations of their communities.

Today, the feelings of the public sector and the university sector have each changed drastically. Faculty, students and staff have become interested and vocal about community life. In turn, the public has become concerned and vocal about university operations of the university.

Alterations in attitudes, nationally and at the Edwardsville campus of SIU, on the part of the community and the university are signs of progress.

This new fusion holds promise of benefits to each sector. Man is not living apart from his community, but within his community.

SIU at Edwardsville is contributing to the community in a variety of ways.

As an employer, in 1970, we had an annual payroll of nearly \$12 million for faculty. Non-faculty staff employees received \$3.6 million in wages. We are one of the state's major employers.

Our faculty numbers 635, with 59% of these people holding doctoral degrees.

A new dimension of area service began on the campus this year when our radio station, WISN, began broadcasting.

This communications tool also serves as a practical classroom for our students who, in a few short hours, be responsible for providing information to all of us from communications media located throughout the area.

This year has been marked by further development of the first professional school to be housed on the Edwardsville campus, the School of Dental Medicine.

Action earlier this month by the Illinois Board of Higher Education cleared the way for us to admit our first class of 24 dentistry students in the fall of 1971.

The school will be housed at the Alton Center originally, but planning money has been approved for the construction of a permanent facility on the central campus in Edwardsville, a building that should be occupied by the middle of this decade.

This school is the fourth for dental medicine training in the state of Illinois, and the only one located outside of Cook County.

Our intent is to bring other professional schools to the Edwardsville campus, so that we may provide a new input of lives, not directing their lives, but sharing their geographical point of reference with a viable neighbor in the community.

The university will also be a contributing member of a larger community.

In turn, we are hopeful that most of the residents of these communities will be able to own and share in the development of a larger community.

On the asset side, we have fine possibilities for advancement both in business and culture because of our geographic location on the banks of the Mississippi and central part of the Nation, the growth of the great Southern Illinois University, the highway developments, industry potential, vigorous and energetic people and a great amount of capital resources.

Without increased efforts in leadership and planning, the ill-fated side of our future has many stumbling blocks.

We must work toward increasing business and industry, and areas of development of residential subdivisions.

A rehabilitation program of old homes in the area would be a stimulus to our economy.

Considering the time involved in effecting many of these programs, we look for the coming year of 1971 to be economically a continuation of the business picture of 1970 with no large variation.

With ample funds and light home construction and home sales, we may find a slight reduction in interest rates during the coming year, although home construction costs will remain about the same as the present price levels, with an increase in interest in trailer and modular homes.

fit from the added dimension that professional schools provide.

The last twelve months have seen growing autonomy for the Edwardsville campus.

The university's Board of Trustees has asked this campus to address itself to the needs of its service area. We intend to accelerate our efforts in that direction.

With decentralization continuing into 1971, we hope for a more rapid response to metro-east area students and needs.

SIU at Edwardsville faces many serious problems in 1971. Upstream in our minds is the proposed dramatic increase in tuition rates for next year and the restriction on tuition waivers for our campus.

For the second time in one year the state of Illinois has imposed upon us tuition hikes which we feel are counter to the state's educational purposes of public higher education.

For Illinois students, the latest increase in fees will demand an amount at 13,700 students and school year. Coupled with the inequity of such a dramatic rise in the tight job market, and the difficulty some students experience in attempting to secure loans from commercial concerns.

A second major problem at the campus at Edwardsville is a lack of space for an increasing student population.

In the fall of 1970, we had to place a freeze on enrollment at 13,700 students and, as a result, several hundred people who wished to enroll were prevented from doing so.

This situation is extremely serious because any new classroom construction projects will not be available for use in less than two years.

Two general classroom buildings, desperately needed, cannot be started because of the state freeze on new construction.

We have grown with metro-east this year and have tried to become more and more a part of the community in which we reside.

A university is made up of individuals and each has his own part of demonstrating citizenship. We are pleased when the university can accept its role as a contributing member of a larger community.

In turn, we are hopeful that most of the residents of these communities will be able to own and share in the development of a larger community.

On the asset side, we have fine possibilities for advancement both in business and culture because of our geographic location on the banks of the Mississippi and central part of the Nation, the growth of the great Southern Illinois University, the highway developments, industry potential, vigorous and energetic people and a great amount of capital resources.

Without increased efforts in leadership and planning, the ill-fated side of our future has many stumbling blocks.

We must work toward increasing business and industry, and areas of development of residential subdivisions.

A rehabilitation program of old homes in the area would be a stimulus to our economy.

Considering the time involved in effecting many of these programs, we look for the coming year of 1971 to be economically a continuation of the business picture of 1970 with no large variation.

With ample funds and light home construction and home sales, we may find a slight reduction in interest rates during the coming year, although home construction costs will remain about the same as the present price levels, with an increase in interest in trailer and modular homes.

Reilly Tar & Chemical Corp.

By Kenneth J. Morrison, Plant Manager

The year 1970 at the Granite City plant of the Reilly Tar and Chemical Corp. proved to be quite successful in practically all aspects of our business. Volume of sales taxed the producing capabilities of the units installed in the plant.

Tar, which is our crude material and which is a byproduct of the coke oven operations, was not the quality material desired for optimum operations due to shortages of coal from which the tar is produced. But adjustments were able to be made whereby a satisfactory product could be manufactured.

In October 1970, after several negotiating sessions, an acceptable and just labor contract was made with the Oil, Chemical, and Atomic Workers Union, Local 7346, representing the bargaining unit for the employees under our plant covering a period for the next three years.

This, in itself, in the midst of labor-management strife as has been seen during this past year, is a notable accomplishment deserving of credit to both the union and management.

During this past year, our local plant has embarked on and accomplished considerable projects toward the beautification and modernization of the buildings, equipment and grounds in a desire for better employee satisfaction, morale, reduction of safety hazards and to present a more pleasing appearance to, and also to become a better member of the community.

Our transition is now complete from the burning of solid fuels to natural gas and fuel oil, whereby smoke emissions have been entirely eliminated to reduce air pollution.

Several dilapidated buildings which have been in need of a potential safety hazard have been torn down and removed from our premises. More of this will be done during 1971.

The local plant has embarked upon an all-inclusive air pollution reduction program, and at great expense, plans to completely eliminate any and all objectionable emissions to atmosphere with a deadline established of 1973. A major portion of this program has already been completed.

Due to the rising costs of labor, materials and freight, even though 1970 was a banner year for production and shipments from this plant, profitability decreased noticeably.

To overcome this decrease, the company has decided to expand the production capabilities of the Granite City plant and 1971 will see the greatest expenditure of capital funds in the plant in its history.

Due to the far-sightedness of the Chamber of Commerce and local and state officials in providing marine facilities through creation of the Tri-City Regional Port Authority, our facilities we shall use extensively in the coming years, we are able to enter into this expanded program competitively.

As has been previously announced, our construction program for 1971 will provide an increased output for our plant of approximately 30% more than that which we have been capable of in the past.

As I see it, the business outlook for the Granite City plant of Reilly Tar & Chemical Corp. in 1971 is one of the most optimistic I have ever had the pleasure to forecast.

M. H. Wolfe & Co.

By M. Freeman Wolfe, President

The forecast for construction work in this area contains both plus and minus factors.

Recently the Federal Home Loan Bank board disclosed plans to pump more than one billion dollars into the home mortgage market in 1971, in a move designed to make more money available for mortgage lenders, savings and loan associations and insurance agencies.

It is anticipated that the effective interest rate to the borrower must surely go down, thus making a considerable gain in the home market in this area.

The F. W. Dodge Division of McGraw Hill predicts a 14% increase in construction of sewage disposal plants and water treatment facilities for municipalities in 1971, in line with the pollution program now gathering momentum nationally.

This percentage will definitely carry over for this area.

The recent lifting of the labor freeze in this county should increase highway construction of all types substantially.

Plans for construction of institutional and commercial buildings will probably not vary significantly, due to sensitivity of money market conditions and municipal bond rates.

Industrial construction in this area is a "mixed bag." Petro-

leum industries are nearing completion of their expansion actively engaged in the installation of air pollution control equipment, made necessary by new state and local regulations.

Some industries, however, have plans for modest capital expansion during 1971.

Netting it out, and looking at the overall picture, I feel that the industry will probably have an increased dollar value over 1970 with the percentage of increase tempered somewhat by the effect of inflation.

Netting it out, and looking at the overall picture, I feel that the industry will probably have an increased dollar value over 1970 with the percentage of increase tempered somewhat by the effect of inflation.

Southwestern Bell Telephone Co.

By Norman Gessley, General Manager, St. Louis Area

An estimated \$300,000 will be spent by Southwestern Bell for construction next year to keep pace with expected telephone growth in Granite City.

Southwestern Bell forecasts that 26,300 phones will be in service in Granite City by the end of 1971.

Today, there are about 35,500 telephones, an increase of 42% since 1969.

This growth means that Southwestern Bell's biggest job is staying in step with customer needs.

Our job today is to provide the communications service Granite City customers will need tomorrow.

The area's population is expected to reach 89,000 during the next four years and Southwestern Bell forecasts predict that Granite City area residents will have 43,000 telephones. About 18,000 of these will be extension phones.

Southwestern Bell spent \$500,000 in 1970 for construction. Much of this was to expand outside plant facilities, including the placement of more than 36,500 feet of underground cable.

Southwestern Bell spent \$500,000 in 1970 for construction. Much of this was to expand outside plant facilities, including the placement of more than 36,500 feet of underground cable.

Southwestern Bell spent \$500,000 in 1970 for construction. Much of this was to expand outside plant facilities, including the placement of more than 36,500 feet of underground cable.

In addition, Touch-Tone service became available to 5,600 Granite City customers in the "777" and "811" prefixes for the first time last May.

Telephone customers in Granite City made about 142,700 local calls and 13,900 long-distance calls on an average business day during 1970.

Southwestern Bell plans to add more than 63,000 feet of buried cable in the Granite City area in 1971 to help meet continued telephone growth.

Southwestern Bell plans to add more than 63,000 feet of buried cable in the Granite City area in 1971 to help meet continued telephone growth.

Southwestern Bell plans to add more than 63,000 feet of buried cable in the Granite City area in 1971 to help meet continued telephone growth.

Tri-City Grocery Co.

By S. E. Pershall Jr., President

The bloom was off the rose as far as our economy was concerned during 1970. Many companies showed less profits during 1970 than they had in many years and some companies even showed substantial losses.

Many concerns were plagued with major strikes during 1970 which hurt our economy considerably.

I would think that 1971 would be a shade better than 1970 as far as the economy is concerned but I doubt very much that there will be a large amount of improvement.

One of the reasons I look for an improvement is because of the cutting of the prime rate of interest charged on loans by our banks. This should be quite a shot in the arm to all of the business community and especially to the construction trades.

Wages continue to spiral upward and there appears to be no letdown in this trend for 1971. The stock market has continued to rise, no doubt mostly because of the cut in the prime rate, but this does reflect the nation's confidence in our country's largest businesses and industries.

Some of the negative situations that will probably develop during 1971 are an increased amount of unemployment, and the very good possibility of more strikes in major industries. Also, retail sales have been sluggish and probably will continue to be so.

U. S. Army Engineer District

By Col. Carroll N. LeTeller,
District Engineer, St. Louis

There is little doubt that in recent years, we, as a people, have had more and more leisure time.

Things other than the earning of a living are becoming more important to us. Clean air, clean water, better housing and rapid transit are foremost.

Add to this a growing concern for aesthetics and almost all other items affecting the quality of living. Modernization of all of our major transportation systems and facilities is also being considered.

Public-minded citizens want action now. They sense that the required technology is either available or near at hand.

During the past year, we have felt the rising groundswell of grassroots political pressure supporting the movement.

Every political leader is tuned to the public demand for action. The mass communication media is not exempt.

The people are anxious to assign responsibilities for planning, construction and execution of the various programs involved.

Many not familiar with big government confuse multiple responsibilities for action as weakness. The problems involved are not simple. No single organization is equipped to handle all of them.

Our forefathers found our water resources so abundant that for the first two hundred years we saw little need for conservation practices. A highly advanced technology and a population of 204,000,000 has brought us to realize that the water resource is not unlimited.

New laws, including the 1969 Environmental Act, now permit the United States Army Corps of Engineers to be responsive to environmental problems.

The St. Louis District has acquired the skills and disciplines to provide the required technology: ecologists, economists, demographers, recreation managers, landscape architect, forester, park managers, rangers and others.

These now complement the engineer and allied skills and disciplines of the past. All future projects will be profoundly affected by this environmental resource team.

In summary, the technology with which to solve our environmental problems is available.

The one great question is: how badly do the American people want to conserve resources, alleviate pollution, and improve the quality of living?

The only important answer to this is: how much they are willing to pay?

The St. Louis District consists of 300 miles of the Mississippi River from Cairo, Ill., northward to Hannibal, Mo., and the tributary basins.

Area-wise, this is almost 26,000 square miles, almost equally divided between Eastern Missouri and Western Illinois.

The District serves approximately three million people and is responsible for construction of approximately \$550 million of federal civil works projects.

The St. Louis District, one of 41 in the Continental United States, employs 950 people and represents a \$200,000 payroll in the community.

For those not familiar, I have included a number of sketches of major projects under construction at this time.

The St. Louis District was established in 1872 and will celebrate its centennial of service to the middle Mississippi River region in 1972.

City of St. Louis Flood Protection Project—Mississippi River
This project, consisting of 11 miles of floodwall and levee, and 28 pumping stations, will protect the city of St. Louis against the flood of record (1844), a flood likely to occur once in 200 years.

Work on the \$78,100,000 project began in February 1959 and is scheduled for completion in June 1972. It is currently 92% complete.

Reach Three (that portion of the project from Maline Creek to the vicinity of Eads Bridge—the northern half of the project) is now essentially complete.

Clarence Cannon Dam and Reservoir—Salt River Missouri
This multi-purpose project, located on the Salt River in northeast Missouri near Perry, was authorized by Congress in 1954. It is of interest for flood control, recreation, fish and wildlife conservation, quality control and water supply.

It is the only project in the St. Louis District with hydro-power as a project feature.

The hydroproject is to be a pump-back storage operation which will power during peak demand periods and pump water back into the lake, using dump power from heat plants during low demand periods.

When completed in 1977, the \$98,500,000 project will have a normal pool of 18,600 surface

acres. The project is currently 11% complete.

Kaskaskia River Navigation Project, Kaskaskia River, Ill.
This \$105,500,000 project is designed to make the lower 50 miles of the Kaskaskia River from Fayetteville to the mouth near Chester, Ill., navigable.

The project will consist of a lock and dam with two regulating gates at Mile 0.8 near the mouth of the river, channel enlargements, overbank cut-offs, and necessary bridge alterations.

Work was started in June 1966 and is 23% complete. The project is scheduled for completion in March 1977 (open to navigation March 1976).

The project will provide cheap water transportation for 1.8 billion tons of known cargo reserves along the lower Kaskaskia River to markets along the inland waterways, as well as other commodities, such as agricultural products.

Meramec Park Lake, Meramec River, Missouri

This \$72,500,000 project is the major element of 31 large, intermediate and small lakes in the comprehensive Meramec River Basin Study.

The multi-purpose project was authorized by Congress in the interest of flood control, water supply, water quality control, downstream fish and wildlife conservation, recreation, navigation, and area redevelopment.

When complete, the normal pool will cover 12,600 surface acres and will be approximately 35 miles long.

Pre-construction planning is now complete and some real estate acquisition has been accomplished. Real estate acquisition is estimated to be completed in December 1976.

Physical construction will require six years to complete, once initiated.

Big Muddy River, Illinois

This \$33,000,000 multi-purpose project is located on the Big Muddy River about 10.7 miles above the mouth. The work was initiated in June 1965 and is scheduled for completion in June 1974.

The project is 61% complete. While completed, the normal pool will cover 18,900 surface acres.

The lake will provide a permanent water supply for over 40 communities.

Mississippi River, Ohio to Missouri Rivers (Regulating Works)
This project extends from the mouth of the Ohio River to North St. Louis.

It consists of construction and maintenance of stone dikes, bank revetment and dredging operations to obtain and maintain a navigation channel in the Mississippi River 300 feet wide (wider in the bends) and nine feet deep northward from the Ohio River to the northern boundary of the city of St. Louis.

Work on this \$76,800,000 project was started in 1891, and is scheduled for completion in June 1975. It is currently 82% complete.

Lake Shelbyville Project Kaskaskia River, Illinois
This \$38,500,000 multi-purpose project is located about 222 miles above the mouth of the Kaskaskia River near Shelbyville, Ill.

Construction has been completed on the main dam, and impoundment of water for the summer of 1971 began on Aug. 1, 1970.

The project was initiated on the project in May 1963 and is scheduled for completion in June 1973.

The main dam, when completed, the reservoir at normal pool will be 11 miles long and 11 miles wide.

We feel sure that the U. S. Army Corps of Engineers will be challenged as never before to provide the best possible service to the public throughout the 1970s.

The plant continues to be a substantial employer in the Granite City area, averaging 1,120 employees in 1970, up 200 from last year, and has paid nearly \$8½

million in wages and salaries. The Granite City plant was cited this year by the Coalition for the Environment, a St. Louis citizens' group, for its outstanding efforts to control air pollution.

As part of a two-year capital improvement program completed in 1969, ASF replaced the plant's open-hearth melting facilities with two electric arc furnaces.

The new furnaces were equipped with bag-house dust and fume control systems to curb air pollution.

ASF also operates foundry plants at Alliance, Ohio, and East Chicago, Ind., and has a fabricating plant in Hammond, Ind. ASF is one of 10 operating units of AMSTED Industries, Chicago.

ASF also operates foundry plants at Alliance, Ohio, and East Chicago, Ind., and has a fabricating plant in Hammond, Ind. ASF is one of 10 operating units of AMSTED Industries, Chicago.

East St. Louis & Interurban Water Co.

By Robert L. Hillard, District Manager

The Granite City District of the East St. Louis and Interurban Water Co. brings 1970 to conclusion encouraged by the progress of the past 12 months and optimistic of what appears ahead in the coming year.

The year 1970 provided numerous distribution and purification plant improvements.

Apparently two miles of water mains were installed for system, reinforcement, replacement of existing deteriorated mains, and additional mains to supply 200 new customers in the Tri-Cities area.

Purification plant improvements during the year included the painting and tuckpointing of the filter plant building in West Granite, cleaning and painting of the chemical mixing tank at the filtration plant, and replacement of the stilling walls in the sedimentation basins.

These improvements allow for greater flexibility in plant operation and enable us to keep pace with increased treatment demands through a well-maintained and efficient filtration operation.

Another most significant development during the year is the completion of the design of a booster station and ground storage tank to be constructed in

the Nameoki and West Ponton Rock area.

In looking ahead it appears that 1971 will be one of the biggest construction years we have experienced in the recent past.

In conjunction with the construction of the booster station and ground storage tank, we will also be installing approximately 2,000 feet of 24-inch water main.

This combined booster station, tank and main installation project represents one of the finest system improvements to the Tri-Cities area possible. It will provide sufficient back-

the Nameoki and West Ponton Rock area.

In looking ahead it appears that 1971 will be one of the biggest construction years we have experienced in the recent past.

In conjunction with the construction of the booster station and ground storage tank, we will also be installing approximately 2,000 feet of 24-inch water main.

This combined booster station, tank and main installation project represents one of the finest system improvements to the Tri-Cities area possible. It will provide sufficient back-

up storage for better fire protection, and insure more stable water pressures—particularly during the hot summer months, when added demands are placed on the distribution system.

It will allow more reliable service throughout our system. We will continue our distribution system reinforcement and improvement program in 1971.

We anticipate that this program, coupled with the installation of mains required to serve an estimated 200 new customers in the Tri-Cities area, will require main installation of approximately 2,000 feet of 24-inch mains in length during the year.

The overall outlook for 1971 is favorable. Although we anticipate fewer new customers in the coming year than recent average years, signs indicate that this is a temporary condition and will begin to change by mid-year.

The management and employees of our organization are proud of the communities we serve and look forward to another year of providing a most essential service.

In conclusion, all of us at the water company would like to say thank you to the residents of the Tri-Cities area for their patience, understanding and assistance during the past year.

and guaranteed loans for purchasing equipment, the railroad market could recover by mid-1971.

To strengthen the possibilities of our participation in this new business we have entered into several major cost reduction

programs in an attempt to become more competitive. Steps are also being taken to reduce costs and increase our production efficiencies wherever possible through detailed industrial engineering analysis.

Manufacturing operations at our plant are in the process of being consolidated to more efficiently utilize our manpower and facilities at our greatly reduced loading, while still providing sufficient capacity to fully meet increased future market opportunities for our cast steel products. This consolidation will be completed early in January.

Through consolidation, a number of buildings have become available and we are making a concentrated effort to seek out new products to utilize these vacated facilities.

Our railroad markets have changed many times over the past years and will undoubtedly continue to do so in the future. Our success in this decade will depend on our ability to adapt to these changing market conditions. Employment at the Granite City plant will improve to the extent that we are successful in our total efforts.

With the prime interest rate going down, I look for 1971 to be a reasonably good year for construction of apartments and commercial buildings.

There could be a boom in Madison County in such construction, due to the already existing need.

I look for there to be a lot of substantial construction work during the next year. I am really optimistic about it.

The more favorable financing outlook from lower interest rates raises the possibility of quite a few developments being carried out, and should improve the prospects of bringing in additional light industries.

Bi-State Development Agency

By Col. R. E. Smyser, Jr., Executive Director

For over 40 years, rapid transit for this Missouri-Illinois Metropolitan Area astride the Mississippi River has been studied and restudied, but positive action has never progressed beyond the talking stage.

However, this time, in 1971—if the citizens of this area are prepared to back their commitment to rapid transit—the proposed 82-mile rail-like system will move expeditiously from a plan into actual construction.

Nearly four years of investigation have gone into preparation of the present Rapid Transit Feasibility Study. Therefore, when next spring the engineering consultants present their final report to the Bi-State Development Agency, which has sponsored the study, the report should be technically complete.

The report will summarize all the investigations made and the alternatives considered, and will recommend the recommended routes, station locations and equipment to be used. Hopefully, the political and civic leadership, represented by the East-West Gateway Coordinating Council and the Mass Transit Committee of the Metropolitan Chamber of Commerce, will accept the plan and initiate its implementation.

Whether or not the metropolitan area has a rapid transit system will in the final analysis depend upon the collective will of the individual citizens of the area.

Therefore, special efforts will be made to insure that all segments of this community are kept fully informed of the details of the plan and why its adoption is needed for the long-range economic growth of the area.

All too frequently there is a tendency to justify decisions of this nature solely on whether or not the service is provided more economically than by a competitive means. However, the provision of economical transportation for patronage by the public is only one facet of the problem.

As would be expected, the studies have indicated that St. Louis will still be a major employment center, but its importance in 1980 will be lessened by the continuing growth of job opportunities in Illinois and St. Louis County. Thus, commuting is becoming a two-way demand.

With the coming of rapid transit, the job opportunities in Granite City and the surrounding area will be made more accessible.

The necessary line extending from East St. Louis will terminate in Granite City, thus making the trip

in either direction one of speed and ease. Not only can rapid transit bring workers to jobs in Granite City, but it will bring the cultural and sports attraction of St. Louis closer to hand.

In addition to making the metropolitan area a better place to live from the standpoint of mobility and the alleviation of overcrowded conditions on our streets and highways, other benefits will accrue to the area from the ecological standpoint of reduction of air and noise pollution.

Thus, to help keep the entire metropolitan area as a good place to live and work, we must all dedicate ourselves to the idea that good transportation is a community responsibility.

With the help of each and every resident of the area, the rapid transit plan of 1971 can be implemented rather than following its predecessors to the shelf to gather dust.

While rapid transit planning is important to the entire metropolitan area, continued growth is anticipated for Bi-State's Water and Public Terminal at Granite City Harbor.

The new temperature- and humidity-controlled warehouse opened last year has already resulted in expansion of traffic, which should continue in the future.

The terminal at Granite City is truly an intermodal complex making possible the transfer of goods from barge to either train or truck.

Being in close proximity to the interstate highways, goods unloaded at the terminal can be transported by truck to Lambert St. Louis Airport in minutes.

South of Granite City, at Bi-State Parks Airport, a new 550-foot runway, suitable for jet traffic, was placed in use in December.

With the completion of the runway, with allied taxiway network and turbine-fuel facilities, should stimulate use by transient aircraft.

It will only be a question of time until this improvement will stimulate related economic development in the vicinity of the airport.

Thus, on all fronts, the Agency is responding to the charge in the compact that the Bi-State Agency proceed with development of the economic development in the vicinity of the airport.

General Steel Industries--Castings Division

By Richard L. Lich, President

As we move into 1971, the Castings Division of General Steel Industries is a good level of production on castings for steam turbine electric power generating plants, wear resistant armor and earth moving equipment, as well as suspension systems for rail rapid transit cars.

However, a major decline in railroad freight car business caused us to reduce our work force during the latter months of 1970 by several hundred people. Employment at the Granite City plant will be off at approximately 800 in January.

The decline in the railroad freight car market was caused by the general slowdown in business activity and the very tight railroad money market. Currently, we do not see any flat car or pulpwood car underframes on order. These products normally make up the largest percentage of the Division's sales volume.

With government action in the form of rate increases

and guaranteed loans for purchasing equipment, the railroad market could recover by mid-1971.

To strengthen the possibilities of our participation in this new business we have entered into several major cost reduction

programs in an attempt to become more competitive. Steps are also being taken to reduce costs and increase our production efficiencies wherever possible through detailed industrial engineering analysis.

Manufacturing operations at our plant are in the process of being consolidated to more efficiently utilize our manpower and facilities at our greatly reduced loading, while still providing sufficient capacity to fully meet increased future market opportunities for our cast steel products. There could be a boom in Madison County in such construction, due to the already existing need.

I look for there to be a lot of substantial construction work during the next year. I am really optimistic about it.

The more favorable financing outlook from lower interest rates raises the possibility of quite a few developments being carried out, and should improve the prospects of bringing in additional light industries.

American Steel Foundries

By A. P. Steinhouser, Works Manager

Shipments of railroad freight car components from the Granite City plant of American Steel Foundries rose sharply in 1970 from a year ago, but are expected to decrease in the coming year because of the current slowdown in new freight car buying.

The decline should only be a short-term one. In the long run, the outlook is more positive because the railroads are still faced with a shortage of freight cars.

Nationally, 31,000 new freight cars were ordered in ASF's fiscal year, which ended Sept. 30, 1970. This is a 49% decrease from the 95,000 cars ordered a year ago.

The Granite City plant is a major producer of side frames and bolsters for use in freight cars, and sales depend directly on the nation's railroad freight car building programs.

The plant's increased shipments of freight car components in 1970 were due primarily to a large backlog of orders.

However, on a national level, the backlog of freight car orders has decreased over 50%. The major backlog shrank, the harder the effect on us will be.

Hopefully, we'll have a turnaround in six months. Despite the decline, production continued to be relatively steady, and the plant had no layoffs in 1970.

The plant continues to be a substantial employer in the Granite City area, averaging 1,120 employees in 1970, up 200 from last year, and has paid nearly \$8½

million in wages and salaries. The Granite City plant was cited this year by the Coalition for the Environment, a St. Louis citizens' group, for its outstanding efforts to control air pollution.

As part of a two-year capital improvement program completed in 1969, ASF replaced the plant's open-hearth melting facilities with two electric arc furnaces.

Police Officers May Earn Degree In Law Program

Southern Illinois University's Vocational-Technical Institute is moving to put a college education within the reach of every law enforcement officer in Southern Illinois.

Courses in the VTI associate degree program in corrections and law enforcement financial aid available to pay the total cost for full-time employees of police and correction agencies.

The program has moved out into the community so that at least one course will be available to every officer in the area, according to Robert C. Phelps, instructor in corrections and law enforcement. In addition, six CLE courses will be conducted at the VTI winter term.

Grants covering full costs are available through the Law Enforcement Education Program of the U.S. Department of Justice, Phelps said.

Courses offered through extension by SIU faculty members. The primer term will be Law and Police Work at Rend Lake Junior College, near Mt. Vernon, taught by Phelps.

Introduction to Crime Control, taught by Robert Alexander at Shawnee Junior College, Ullin, Criminology, Illinois State Penitentiary at Vienna, Charles Frazier.

Introduction to Crime Control, Southern Illinois Junior College, Harrisburg, Don Ragdale. Interpersonal Relations, Illinois State Farm, Vandalia, Tom Koehne.

Scheduled at VTI are: Criminal Behavior, Law Enforcement and Community Problems, Principles of Investigation, Assessment, in Criminology, Law Corrections, and Supervised Practice in Criminology.

All are regular university courses for college credit and persons enrolling must meet SIU entrance requirements. Information on enrollment procedures, federal tuition grants, and class meeting times and dates can be obtained by writing to Phelps or CLE faculty chairman Melvin Wallace at the SIU Vocational-Technical Institute, Carbondale 62901, or by telephoning either individual at (618) 453-3701.

Mrs. Bright, 76, Dies in Highland

Mrs. Madge Lillian (Hargrave) Bright, 76, of Rural Route Three, Edwardsville, died early Saturday morning at St. Joseph's Hospital, Highland. She had been ill several years.

Mrs. Bright was born in St. Louis and lived in Collinsville before moving to Edwardsville. She is survived by her husband, George Bright; two sons, George Bright Jr. of Collinsville and William Bright of Edwardsville; three daughters, Mrs. John (Mary) Brown and Mrs. Orville (Eleanor) Eaton of Collinsville and Mrs. Kenneth (Joyce) Koenig of Edwardsville; one brother, Sam Hargrave of New Douglas; four sisters, Mrs. Irene Brown and Mrs. Marie English of Evansville, Ind.; Mrs. Wilma Hankens of Galacia and Mrs. Gladys Langford of Carmi; 10 grandchildren and 11 great-grandchildren.

Funeral arrangements may be found in today's obituary column.

Mrs. Rosa Amend, 74, Succumbs at Hospital

Mrs. Rosa L. Amend, 74, of 125 W. Miller Ave., Jefferson City, Mo., died at 3:10 p.m. Sunday at St. Elizabeth Hospital where she was a patient for a week.

Born in Marion County, Mo., she was a lifelong resident of Jefferson City. She was a retired farm matron of a penal institution and was a member of the New Hope Baptist Church, Jefferson City. Her husband, Earnest Amend, died in 1956.

She is survived by two daughters, Miss Rosie Amend of Jefferson City and Mrs. Margie Leone of Granite City; four sons, Cecil and Paris Amend of Jefferson City, Cortez Amend of Goldendale, Wash., and Ralph Amend of Kansas City, Mo.; eight grandchildren and three great-grandchildren.

An obituary notice appears elsewhere in this issue.

Mrs. Clara Oburn, 68, Dies; Leaves Son Here

Mrs. Clara L. Oburn, 68, of 1541 Oaden Ave., Wellston, Mo., died early Saturday morning at St. Elizabeth Hospital, where she was a patient since Dec. 23. She had been ill since Dec. 15 and previously was hospitalized in St. Louis.

A native of Marion, Ill., Mrs. Oburn had resided in St. Louis for many years. She had been a frequent visitor of her son and daughter-in-law, Mr. and Mrs. Elmer Oburn Jr. of Granite City.

Mrs. Oburn was a member of the First Church of God of St. Louis.

Survivors also include her husband, Elmer Oburn Sr.; a daughter, Mrs. Ruth Olvey of Florissant, Mo.; her mother, Mrs. Eugenia Anderson of Wellston; and four grandchildren, Miss Susan and David Oburn of Granite City and William and Lynn Olvey of Florissant.

Funeral services will be held Tuesday at a St. Louis mortuary and in Marion, Ill. Burial will be at Marion.

Mrs. Rowley, 83, Dies; 70-Year GC Resident

Mrs. Minnie (Couch) Rowley, 83, 2225 Delmar Ave., died at 7:30 a.m. Sunday at St. Elizabeth Hospital where she was a patient two weeks. She was ill for the same period.

Born in Dixon, Mo., she lived in Granite City 70 years. She was a member of the Dewey Avenue Methodist Church.

She is survived by one daughter, Mrs. Raymond (Gladys) Pettit, Granite City; a brother, Clay Holmes, St. Louis; and three sisters, Mrs. George (Virgie) Arena and Mrs. Walter (Ora) Richie, both of Lisle, Ill.; and Mrs. Lucy Richie, Mountain Home, Ark.; six grandchildren and four great-grandchildren.

She was preceded in death by her son, William Vicor Couch, and by a sister, Mrs. Florence Winter, both of Granite City.

Funeral arrangements are given in the obituary column.

GC Couple Name Son

Craig Lewis Yager and Mrs. Charles Yager, 1700 Courtney Blvd., are announcing the birth of their second child, a son, Dec. 28, at St. Elizabeth Hospital. The infant weighed eight pounds, 13 ounces and has been named Craig Lewis.

The Yager's older child is Carla, 2. Grandparents are Mrs. Ellen Grace Hoffman of Granite City and Mr. and Mrs. John Yager of Shawnee, Kan.

Auto Antenna Bent
Alex F. Toth, 2834 Edison Ave., reported at 9:40 a.m. Sunday that someone bent the radio antenna of his auto while it was parked in his driveway during the night.

SOCIETY

Eta Chapter Has Dinner Party

The annual Christmas dinner party of Eta Chapter of the Phi Tau Omega sorority was held at Sunset Hills Country Club last week with 35 members and guests present.

The latter included the following: Mrs. Pauline Tegel, Mrs. Ruth Wilderman, Mrs. Laveada Knobbe, Mrs. Karen Costello, Mrs. Ruth Schuster, Mrs. Susie Horton and a pledgee, Mrs. Evelyn Allen.

The usual holiday decorations of holly, evergreens and lighted candles were used and favors were in keeping with the occasion.

The hostess committee was composed of Mrs. Judy Adams, Mrs. Georgiana Van Buskirk, Mrs. Jo Ervay, Mrs. Mary Lou Richeson, Mrs. Loraine Butler, Mrs. Gladys Waggoner, Mrs. Valeta Bauder, and Miss Mary Hassler.

Miss Hilma Schroeder entertained the group with a history of the sorority, and there were games, the prizes going to Mrs. Harriet Horn and Mrs. Evelyn Todd.

FORMER RESIDENT IS ENGAGED

Mr. and Mrs. Frank E. Ahlvers, 2837 E. 24th St., have received word of the engagement of their grandson, James L. Chandler Jr., a son of Mr. and Mrs. J. H. Chandler Sr. of Long Beach, Calif., formerly of Granite City, to Miss Barbara Buckman, a daughter of Mr. and Mrs. Rankin Tysons of Long Beach.

Mr. Chandler attended Granite City High School and after moving to California was graduated from Millikan High School. A June wedding is planned by the young people.

MRS. ROBERT H. KARANDJEFF, the former Bonnie Lou Austin, who was married Saturday morning at First United Presbyterian Church.

Miss Bonnie Lou Austin, Robert Karandjeff Wed

First United Presbyterian Church was the scene of the wedding Saturday morning of Miss Bonnie Lou Austin, a daughter of Mr. and Mrs. Denver B. Austin, 3169 Jill Ave., and Robert Henry Karandjeff, a son of Mr. and Mrs. Robert H. Karandjeff, 5541 Cleveland Blvd.

Rev. Dr. David B. Maxton performed the ceremony at 11 o'clock before the altar decorated with arrangements of white gladioli and pompons.

A traditional gown of ivory satin heavily embellished with Alencon lace and reembodyed with seed pearls and crystals was worn by the bride. It featured a Victorian neckline and long sleeves tapering to points at the hands. A mantilla, which cascaded from the head to form a chapel train, was completely bordered with matching lace and the bride held a cascade bouquet of stephanotis. Elegance carnations and ivy, centered with a white orchid.

Miss Patricia Friedline was maid of honor, and Mrs. Gary Johnson, a cousin of the bride, and Miss Karen Karandjeff, the bridegroom's sister, served as bridesmaids.

They were dressed alike in ruby red velvet with moiré veils of velvet and white satin brocade. Camelot bonnets of ruby velvet had matching veils and their flowers were nosegays of white carnations and red Sweetheart roses.

Michael Lewis was best man, and the list of groomsmen and ushers included Patrick Harris, Denver Austin, the bride's brother, James Karandjeff, a cousin, and Eric Tremayne.

The bride's mother wore a two piece knit suit of white and light blue, while Mrs. Karandjeff, the bridegroom's mother, chose a jacket dress of brown wool. Both wore matching accessories and white orchid corsages.

The wedding reception was held in the Officers Club at the Army Depot. Mr. and Mrs. Karandjeff will reside in Belleville.

MRS. MARIE WHITTLE UNDERGOES SURGERY

Mrs. Marie Whittle, secretary in the offices of the Protestant Welfare Association, is recovering in the Irving Community Hospital in Irving, Tex., after an emergency gall bladder operation which she underwent shortly after arriving there to spend the holidays with her son-in-law and daughter, Mr. and Mrs. John Doran, 1901 MacArthur Ave.

She expects to leave the hospital in a few days and will convalesce at the Doran home before returning to Granite City.

Miss Susan Doty, maid of honor, and Miss Pamela Mount, a sister of the bridegroom, bridesmaid, were dressed alike in gowns with Burgundy velvet jumpers and pink crepe A-line skirts, floor-length. Matching headpieces and veils complemented their costumes and

GOLDEN WEDDING. Mr. and Mrs. Roy R. Shillato, former Granite Cityans now residing in Edwardsville, will observe their 50th wedding anniversary with a reception Sunday at the Knight of Columbus Hall on Marine Road, Edwardsville.

Roy Shillatos to Observe Golden Wedding at Anniversary Mass

Mr. and Mrs. Roy Shillato of Edwardsville, formerly of Granite City, will observe their golden wedding anniversary Sunday at an anniversary Mass at 7:30 a.m. at St. Mary's Catholic Church, Edwardsville, followed by a reception from 2 until 4 o'clock at the KC Hall on Marine Road.

Mr. and Mrs. Shillato were married Jan. 12, 1921, at St. Joseph Catholic Church in Granite City by the Rev. D.J. Ryan, then pastor of St. Joseph.

The anniversary celebration is being arranged by the children and grandchildren. All relatives and friends are invited to attend. Mr. and Shillato have requested that gifts be omitted.

Miss Carol Oglesby is Bride of Daniel Mount

One of the first of the 1971 weddings was that of Miss Carol Suzanne Oglesby, a daughter of Mr. and Mrs. Charles E. Oglesby of Decatur, and Daniel Conrad Mount, a son of Mr. and Mrs. James C. Mount, 2116 Bern Ave., Granite City.

The ceremony took place Saturday evening at the Free Methodist Church in Decatur with the Rev. Elmer L. Fenton, an uncle of the bridegroom, officiating at 7 o'clock.

White flowers in wicker baskets on the altar, lighted candles in spiral candelabra and greenery formed the setting for the service. A musical program was provided by Mrs. Juanita Penwell, organist, and Mrs. Robert Smith, of Greenville, Ill., soloist. The latter sang "The Wedding Prayer".

The bride was escorted by her father. She wore a gown of antique satin and Venice lace with an A-line silhouette. Pink satin ribbon and lace trimmed the neck, cuffs and hem of the gown and the edge of the detachable train, as well as the long veil. White roses, carnations and stephanotis were combined in the bride's bouquet, tied with pink ribbon streamers.

Miss Susan Doty, maid of honor, and Miss Pamela Mount, a sister of the bridegroom, bridesmaid, were dressed alike in gowns with Burgundy velvet jumpers and pink crepe A-line skirts, floor-length. Matching headpieces and veils complemented their costumes and

they carried Burgundy velvet muffs to which were attached pink roses.

Theresa Carter of Decatur, and Jody Fenton, cousins of the bride and groom, served as flower girl and ring bearer.

The former wore a long dress of pink velvet with white lace trim and carried pink petals in a white wicker basket. Lonia Fenton, another cousin of the bridegroom, Al Jackson, Larry Lakin, and Kelly Hogan, also cousins, made up the list of attendants for Mr. Mount.

Mrs. Oglesby, the bride's mother, wore a midnight blue knit dress with matching accessories. The bridegroom's mother was in a sea green knit costume and brown accessories. Both wore corsages of white roses.

The wedding reception was held in the church fellowship hall with Mrs. Vicki Hogan, the bridegroom's cousin, in charge of the guest book. Also assisting was Mrs. John Oglesby, a sister-in-law of the bride.

Both young people will graduate in June from Greenville College, Greenville, Ill. The bride is majoring in psychology and Mr. Mount is a sociology major. He is a graduate of the Granite City High School and bride attended Eisenhower High School in Decatur.

They will reside at 410 E. Winter St., in Greenville while completing their college courses.

TRAVELING BY AIR? CALL HOLIDAY SERVICE, 452-3131

MRS. GARY ELLIS, a bride of Saturday. Before her wedding at St. Elizabeth Catholic Church she was Miss Kathryn Winkle.

Ellis-Winkle Nuptials Held Here Saturday

The wedding of Miss Kathryn Winkle, a daughter of Mr. and Mrs. Daniel Winkle, 4202 Breckenridge Lane, and Gary Ellis, whose parents are Mr. and Mrs. Gilbert Ellis, 721 Twenty-sixth Place, took place Saturday afternoon at St. Elizabeth Catholic Church.

The Rev. Virgil Mank officiated at the 2 o'clock ceremony before the altar decorated with arrangements of white gladioli and chrysanthemums.

Mrs. Clara Judd presided at the organ and accompanied the vocalist, Miss Kathie Engelmann, as she sang "Ave Maria", "Song of Ruth", and the Lord's Prayer.

The bride chose a floor-length Spanish type gown of Chantilly lace over tulle featuring an empire waist enhanced with sequins, a square neck, bishop sleeves and an A-line skirt which swept into a brush train. A mantilla frame, edged with matching lace, secured a cathedral train and the bride carried red roses and joy on a lace fan.

Miss Patricia Winkler was maid of honor for her sister, and Mrs. Richard White and Mrs. Michael Silvey served as bridesmaids. They wore identical gowns of ruby red velvet styled with Empire waists, slightly gathered skirts and long sleeves cuffed with ruffles.

Ruffles of velvet also outlined the high necklines, scooped down the back. Their white lace mantillas were accented with clusters of ruby leaves and they held nosegays of white carnations and Burgundy carnations tied with moss green velvet ribbon.

Dana Snider, a cousin of the bridegroom, and Larry Wilson served as flower girl and ring bearer. The former was dressed like the older girls and carried a miniature bouquet of the same flowers.

Gilbert Ellis was his brother's best man, and the list of groomsmen and ushers included Gary Ellis, a cousin, John Winkle, the bride's brother, Dan Winkle, another brother,

and Randall Ellis, the bridegroom's brother.

For her daughter's wedding Mrs. Winkle wore a coat and dress ensemble of avocado green and accessories of gold, while the bridegroom's mother chose a pale pink A-line dress with black accessories. Both had corsages of red roses.

A reception was held at the Long Lake Firemen's Hall with Mrs. William Carrico in charge of the guest book.

After a honeymoon at Tan-Tan in the Ozarks the newlyweds will reside at 4025 Central Lane, Granite City.

The bride, a senior at SIU-SW, majoring in theatre and physical education, also belongs to the dance company at SIU. She is employed in the enrollment office at the university.

Mr. Ellis is employed as a mechanic by a St. Louis automobile agency. He attended Bailey Technical School. The rehearsal dinner was given at the Stoplight Restaurant in East St. Louis by the bridegroom's parents.

NEW YEAR'S EVE PARTY

Mr. and Mrs. Walter Baumberger, 2415 Pine St., entertained guests at a champagne party and dinner New Year's Eve.

Among those present were Mrs. Emma Baumberger, Mr. and Mrs. Marvin Taylor, Mrs. Sharon Case and sons Bruce and Scott, and Mrs. Maureen Cochran.

Part of the evening was spent at cards and additional guests during the evening were Mr. and Mrs. Ronald Eads of Madison, Wis., who were holiday guests of relatives.

ORAL DEAF CHILDREN HOLD HOLIDAY PARTY

The Bi-County Parents Group for Hearing Impaired Children hosted a family holiday party at Lake School. The tables were decorated by Mrs. Gail Gargac, and gifts were distributed.

A magician, Rick Cardwell, mystified the audience with his program of magic. A graduate of Granite City High School, he is a freshman student at Northwestern University. Several of the children assisted with various tricks.

A comedy team of "Slapsie and Mase," professional clowns who are known locally as Mr. and Mrs. Max Metz Jr., were next to entertain the gathering. Their witty flower and magic lightbulb routines delighted the children.

A brief session was held, with President Steve Gargac in charge. Announcement was made that a Brownie troop has been formed and is meeting at St. John's Church in Fairview Heights.

Gargac reported that the Illinois Parents of Hearing Impaired Children, a national "state day" in Jacksonville in the fall.

Parents were reminded of a census of the deaf and of interpreters for the deaf, and also of a new fund-raising project of collecting the names of volunteers. The batteries are sold to a reclaiming plant, and all proceeds go toward purchasing equipment and items for public school oral-deaf classrooms in St. Clair and Madison Counties.

Anyone wishing to participate is to contact Gargac at 877-3156.

Two hundred attended the party, planned by Mrs. Sandy Grote and her committee, Mesdames Gail Gargac, Shirley Scully and Harriet Lowrey.

Entertainers included Cardwell, Mr. and Mrs. Metz and Samuel Coleman. Additional assistance with the party was provided by the Beta Sigma Phi East St. Louis chapter, Rural carriers Auxiliary of Illinois and American National Bank.

Candy-fund stockings were given to all the children, and refreshments of each family's favorite holiday dessert or cookies were served. The punch table was adorned with a large centerpiece which was given to Miss Reezeather Taylor of Madison.

HOLIDAY GUESTS AT HANCOCK HOME

Mr. and Mrs. Ira Hancock, 2630 Iowa St., had as their guests at a dinner party New Years Day Mr. and Mrs. Guy Hancock, Mrs. Edith Penrod, Mrs. Alva Stearns, Mr. and Mrs. Forrest Sexton and Mrs. Sharon Watson.

Other guests of the Hancocks over the Christmas holidays were Mrs. Pat Sanders and daughter Leslie of Kansas City, Missouri.

Daughter Born to Former Resident

Mr. and Mrs. Edward Kaleita Jr., of Brunswick, Ohio, are parents of their third daughter, Jill Kathryn, born Dec. 27. The weight of the infant was four pounds, five ounces.

The grandparents are Mr. and Mrs. Richard Calaway, 2157 Delmar Ave., and Mr. and Mrs. Edward Kaleita Sr., of Parma, Ohio.

Her remains will lie in state at the MERCER MORTUARY, 1416 N. Main St., from 6 p.m. today, Jan. 4. Services at 10 a.m.

Levee Attorney Moves to Dismiss Fee Complaint

Dismissal of a suit filed in Madison County Circuit Court seeking a declaratory judgment on the legal status of fees paid attorneys of the East Side Levee and Sanitary District during the last eight years was filed last week by John R. Sprague, Belleville attorney.

The proceeding was filed last October by Marshall Smith, assistant Madison County state's attorney, requesting the court to declare illegal certain attorney fees paid over the eight-year period to various attorneys who served as levee district attorneys. The suit also asked recovery of any of the \$282,000 in attorney fees held by the court to be illegal over the period.

Sprague filed the dismissal motion in behalf of himself and other levee district attorneys and members of the board of trustees. His motion set up 18 allegations upon which he bases his motion for dismissal. Among those attorneys named in the suit with Sprague are John Huban, Frank Summers, Marvin Goldenherst and John A. Block Jr.

Filing of the suit followed conviction of the four levee board members—Morris Campbell, George Duff and Lawrence Toland of East St. Louis and William "Mike" Ebersold of Venice—on charges of misconduct in office that included allegations of paying levee board attorneys in excess of the amount allowed by statute.

In asking dismissal of the suit which seeks a declaratory judgment on attorney fees of previous years, Sprague contended that Smith was without authority to bring the action in the name of the "People of the State of Illinois, and that the action was filed in the wrong court—Madison County instead of St. Clair county where the levee district offices are located.

Sprague also alleges in his motion that the fees were ordered paid to levee district attorneys by the City Court of East St. Louis and that Illinois five-year statutes of limitations would apply in the matters involved in the suit. He also charged that the statute limiting to \$3,500 the annual amount to be paid levee district attorneys is unconstitutional since it places such limitations for any other municipal entities in the state.

As a result of the conviction of the four levee board trustees, Illinois Governor Richard B. Ogilvie has ordered a special election to name a new levee board that would serve out the present terms, which expire in 1972. Governor Ogilvie set the primary election for May 4 and the special runoff balloting for June 2.

Cahokia Mound Council Meeting Set Jan. 28

The annual business meeting of the Cahokia Mound Council, Boy Scouts of America, is scheduled at 6:30 p.m., Jan. 28 at the Sunset Hills Holiday Inn, it was announced today by G. Rollin Henn, council president.

Henn said the meeting is the most important of the year concerning the Boy Scout program. Many busy men serve actively in Scouting, and I want to give them time enough to adjust schedules so that we may have maximum attendance," Henn said.

The annual meeting includes election of Council officers and board members. Each institution sponsoring scouting has a vote which is cast by their institutional representative.

Henn urged all institutional representatives be present. Reservations for the dinner meeting must be made at the Council office, 1538a N. Main St., no later than Jan. 25.

Accident Correction

An auto driven by Ruth M. Smith, 1741 Courtney Blvd., was struck from behind by a car driven by Louise Harvey, 2229 Erin Drive, in an accident last Monday, rather than as previously reported.

Bullet Shot into Home

Mrs. Mary McDonald, 1542 Johnson Road, reported at 5:20 p.m. Saturday that someone shot a bullet in the rear bedroom of her home last Wednesday night.

Auto Struck, Hits Sign In Venice Mishap

Sandy W. Town, Como, Miss., told police that her auto was struck by a hit-and-run motorist at 5 a.m. Friday, causing her to knock down a sign on the Venice Gas and Oil Co. parking lot, 1101 S. Fourth St., Venice.

Miss Town said her auto was southbound on Fourth Street and was struck in the rear by an auto pulling out of the alley in the parking lot. She then lost control of the car which struck the sign. The other auto left the scene of the accident.

Son Born to Former Resident

Mr. and Mrs. James Brown, of Normal, Ill., are parents of a 6 pound, 8 ounce son born Jan. 1. The mother will be remembered at Dolores Hendricks, a daughter of Mr. and Mrs. Raymond Hendricks, 2812 Iowa St.

The baby has been named Christopher Allen. He has a brother, Douglas, 12 years old.

Pickup Truck Damaged

A window on a door of a pickup truck owned by the Partney Sheet Metal Co., 2500 Missouri Ave., was broken and a rear tire was flattened while it was parked during the night at the shop, it was reported at 2:30 p.m. Saturday.

Navy Missleman to Join Sub in Hawaii

Missile Technician Third Class David L. Atkinson, U.S. Navy, departed last week for a new assignment at Groton, Conn., after spending a 30-day leave at home with his parents, Mr. and Mrs. Jack E. Atkinson, 1933 Lynn Ave.

The serviceman will remain in Groton for the next eight weeks prior to reporting to Pearl Harbor, Hawaii. At Pearl, he will join the crew of the nuclear attack submarine, USS Daniel Webster, for a period of sea duty.

A Polaris missile technician, MT3 Atkinson was graduated earlier this year from several special instruction courses in preparation for service in nuclear submarines.

He enlisted in the Navy on Aug. 14, 1969, and was last based at a Naval installation near Virginia Beach, Va. The sailor was graduated in June 1969 from Granite City High School.

First Child Born

Mr. and Mrs. Robert Smith of St. Louis are announcing the birth of their first child, a son, Jan. 3 at St. John Mercy Hospital in St. Louis. The infant weighed 6 pounds, 9 ounces and has been named Mark Thomas.

Mrs. Smith is the former Cheryl Wilson of Granite City, a daughter of Mr. and Mrs. Norman Burnett of Route Two.

Tired of sin? Sick? Bound by the powers of sin? Depressed? Why not bring your needs to God? Come where the Spirit is moving. Enjoy the outstanding ministry in song and word as the two ladies labor together against the forces of sin.

DEE LYNN & GAY LYNN CHURCH

EVANGELISTS OF INDIANAPOLIS, INDIANA

Rev. Charles Browning, Pastor

FROM THE STATEHOUSE

By
LT. GOV. PAUL SIMON

An Inspirational Story

Part of the life of a public official is to move from one problem to another, from one troubled spot to another, and there are times when you feel the world is filled with problems and problem-makers.

Then something always happens to give you the other side. Recently I was asked to present a plaque to Mr. and Mrs. Wordie Murrell of Taylorville, Illinois—and if you need a little inspiration today, their story can give it to you.

Mr. and Mrs. Murrell were married 48 years ago. He worked as a railroad clerk, and after a few years of marriage it became clear that they would have no children of their own, and so in March, 1926, they opened their home to a foster child.

Since that time they have had 42 foster children in their home—30 of whom they raised from small children to adulthood.

They have had 12 children through college. One is working on a master's degree; one is in a seminary; and one is in his third year at Southern Illinois University, majoring in special education.

There are four children still at home, including 17-year-old twins who began life with the Murrells at the age of four days.

Through the years the children have had everything the Murrells could give them. Mrs. Murrell, for example, worked for 17 years at the local hospital in order to pay for music lessons for the children.

Mr. Murrell, now retired, has been a leader in the Boy Scouts for the area. Mrs. Murrell is a former area leader of the PTA.

The climax to the story is significant: Mr. and Mrs. Murrell are black and live in a community which is almost all white—and the majority of young people they have helped are white.

In a world much too filled with hatred and problems, it is refreshing to know Mr. and Mrs. Murrell.

Grassroots Government

Pakistan Storm Victims Aided

(U. S. Department of State)

What is being done by the U.S. government to aid the victims of the cyclone in East Pakistan? B.G.E.

Dear B.G.E.: In the two-week period following the cyclone disaster that struck East Pakistan on Nov. 12 and 13, the U.S. government moved about 450 tons of emergency relief supplies by aircraft to the stricken area. The supplies include food, clothing, medicine, boats and helicopters.

"We are continuing to move supplies to the disaster area as rapidly and efficiently as possible," reports Maurice J. Williams, deputy administrator of the Agency for International Development (AID), who was named by President Nixon to head the Disaster Action Group to coordinate all U.S. government relief efforts.

The Action Group consists of senior representatives of the Departments of State, Defense and Agriculture, as well as of AID.

The supplies shipped so far include civil defense survival biscuits provided to AID by the Office of Civil Defense to help sustain survivors of the disaster while basic foods such as rice and wheat are being made available in quantity from existing stocks in Pakistan and supplemental shipments from abroad.

Other U.S. relief measures include a grant to Pakistan of \$6.6 million of wheat and an additional \$7.4 million worth of U.S. farm products under the Food for Peace Program.

Medical assistance includes a joint U.S. Public Health Service and U.S. military medical team on the ground in the disaster area.

The Department of Defense is maintaining on standby alert a unit of preventive medical personnel, and the U.S. Public Health Service has a contingency plan for additional medical aid if requested by the government of Pakistan.

Some Repair Expenses Capitalized

(Internal Revenue Service)

Q. Is the cost of fixing up my barn deductible? A. Repairs and maintenance to buildings and equipment used in farming are deductible business expenses. However, when expenses of the nature mentioned add to the value of the property or appreciably extend its life, they must be capitalized. For example, you repair the roof of your barn, the expense is deductible. If you replace the roof, the cost must be capitalized.

Q. My daughter took a part-time job for the holidays. Is there a limit on how much she can make without costing me the exemption I claim for her?

A. If your daughter is under 19 at the end of the year or qualifies as a full-time student, the amount of her earnings will not affect the exemption you claim for her.

The other dependency tests must continue to be met, however.

Year Just Ended Set the Stage for Era of Growth and Progress Throughout the Decade

Just as 1970 served as the launching pad for a new decade in the struggle for an unprecedented era of progress—some of it assured, but most of it dependent directly on the amount of citizen, business, labor and governmental planning and action.

The year just ended was not lacking in towering achievements. Included were the agreement between the state of Illinois and the city of St. Louis to cooperatively establish a second major metropolitan area airport, situated in Illinois. The \$350 million airport is expected to spawn hundreds of millions of dollars of related and unrelated construction.

Funds were provided to enable the SIU-SW School of Dental Medicine to accept its first students in September 1971.

The Mississippi River Festival summer concert series survived a severe pre-season financial problem and then had its most successful year, establishing a solid base of public support.

Illinois voters adopted a modern state constitution, replacing their century-old charter. In the process, they placed themselves on a par with the nation's other states by electing judges, retention of the death penalty and retention of 21 as the minimum voting age. By a later U.S. Supreme Court ruling, the voters will be permitted to vote on federal officials.

Voters of the state also approved a \$750 million Illinois bond issue to fight water pollution. It may allow Granite City substantially in carrying out a \$4 million secondary sewage treatment program and in installing a 3½ million interceptor sewer system.

The extended Great River Road was opened as far south as Newburgh, Ark. The more than two-year fund freeze on highway improvements involving federal tax aid was brought to an end, with a minority training and procedure agreed upon for construction crews.

The Madison County government expanded its staff of night deputies and purchased voting machines. Madisonians elected a new mayor and moved to eliminate financial logging of municipal employees. Uniform tavern hour regulations were enacted.

Venice and Madison jointly upgraded their comprehensive plans and planned renewal programs, including replacement of dilapidated homes with new residences. Venice received a national Annetts award for setting an example, subsequently followed by hundreds of other cities, in honoring its war dead.

Madison made steady progress in develop-

ing its Stephen Maeras Industrial Park and took preliminary steps to profitably utilize the city's closed Chain of Rocks Bridge.

Granite City municipal officials collectively began taking a more positive stand toward commercial and apartment development proposals.

The Tri-City Regional Port District completed rail-barge facilities and placed a new warehouse in use. Its expanded services were a factor in enabling the Reilly Tax & Chemical Corp. to announce a 50% expansion project.

The Chemico Metals Co. plant at Mitchell was completed, and the Gaslight Plaza shopping center at Pontoon Beach was formally opened. Illinois Power Co. installed an electric peaking unit at Stallings, and the A. O. Smith Corp. placed in use a 25,000-square-foot plant addition.

It was decided to hold an observance in 1971 commemorating the 75th anniversary of the city of Granite City, 50th anniversary of the City Park district and the 50th year since the Sisters of Divine Providence began their operation of St. Elizabeth Hospital.

The Tri-Cities Chamber of Commerce completed the local phase of qualifying for national accreditation, and it was announced that a "You-Nited For Action" community progress congress will be held here.

Studies were launched on possible ways to utilize the Granite City Army post after its scheduled inactivation in mid-1971. Funds were raised toward creating a downtown mall and semi-mall, and detailed planning began for a \$1 billion-plus rapid transit system. Exterior work was completed on the \$9 million-plus St. Elizabeth Hospital wing.

The list could be lengthened. A more detailed review of the challenges of 1971 will be presented in the near future.

But this recital of 1970 occurrences makes it clear that the Quad-Cities have been a busy, looking-to-the-future community, aware of both assets and shortcomings—and aware that what local residents do or don't do can be the biggest single factor in determining what lies ahead.

Lt. Gov. Simon Right in Urging 1971 Legislation on Disclosure of Income

Lt. Gov. Paul Simon is right in calling for new legislation in the wake of disclosure that the late Secretary of State Paul Powell had hidden about \$800,000 in private funds, \$750,000 in Mr. Powell's Springfield apartment and \$50,000 in Mr. Powell's Springfield office.

The lieutenant governor annually discloses his income in detail and has frequently urged that other officeholders do the same. A bill to be introduced in the 1971 General Assembly would require disclosure of income by certain officials to the public.

There is no certainty at this point that Secretary Powell regarded the money as income; it may have been amassed as some form of campaign treasury.

But the existence of such a large amount of cash in shoe boxes, envelopes, metal boxes and brief cases—kept in a closet—raises so many questions about how state officials handle funds that the proposed income disclosure law could be of great value in enlightening citizens and restoring their confidence in the way government is run.

In addition to the legislation to be considered at Springfield, a thorough official investigation is needed, one in which the public can be kept fully advised of all findings.

A U.S. Internal Revenue Service inquiry already has been started to determine whether taxes are owed on the money, but the IRS study by the nature of the disclosure to public scrutiny, unless it results in claims for back taxes against the Powell estate, or unless there is evidence of fraud and action is taken against those alleged to have been a party to it.

Additional Year-Round Swimming Facilities Needed in This Community

To the Editor: I wish to commend the Granite City School System for recognizing, however belatedly, that there is a year-round sport participating in by many Granite City school children.

The sport is swimming. The recognition is in the form of a plaque honoring Mark Buegler, who had to be a national record to get the nod. Granite City has produced state swimming winners in the past, which is quite a feat, but the feat went unnoticed by the schools.

We spend a great deal of money touting football, which runs a very short season. Boys do win scholarships for football, of course, but girls and swimmers are left out.

We now have a place for ice skating. I'm not knocking it. I think it's great. But we have no state or national winners to boast of in ice skating. The city has had only one pool has an active swim team and it is a private pool, not available to all.

We have a very active winter swimming team at the YMCA. The city has a schedule of 40 meets this winter season. The season runs from mid-September to April.

The swimmers practice five mornings and three evenings a week. This is available to all youngsters of both sexes.

These hard-working swimmers are laboring under a handicap of outdated facilities at the Y.Y. I think it's high time for the city to build a new pool in the park district and the YMCA to join hands and provide for year-round swimming.

The newspaper editorialized

how great it was for the ice rink to draw X number of visitors here for the speed skating contest in the future. Christmas trees here for the speed skating contest in the future. Christmas trees here for the speed skating contest in the future.

At a Thanksgiving weekend three-day meet in St. Louis, there were 300 participants plus parents and officials. Come on. Let's give these talented youngsters a boost. Let's give them a new home in Granite City.

MRS. SHARON LOFTUS

USE ULYSSES TREES WHICH CAN BE PLANTED LATER
To the Editor:

In this holiday season, it would seem appropriate to suggest that in the future, Christmas trees be of either the live, plantable variety or of the manufactured type.

We should seriously consider the origin and disposal problem our society has with cut trees. Each year, 40,000,000 to 50,000,000 evergreen trees are removed from the land in midsummer, leaving the stump and root system. They are distributed by the thousands of trees after Christmas, must be collected and destroyed.

The disposal of solid wastes in our country is reaching tremendous proportions, and it would seem foolish for us to continue to compound this problem each year with an ever-increasing number of dead, highly inflammable evergreens to be disposed of.

Let us, the public, be aware of the part we play in the living cycle of things. Evergreens are beautiful, functional elements of our environment. They, like all plants, absorb carbon dioxide and give off oxygen into the atmosphere.

If we continue our tradition of Christmas trees as a festive symbol, and we believe we should, let us stop the destruction of tens of millions of trees annually and use live trees to be planted afterward for all to enjoy—or purchase these manufactured ones that can be stored and reused year after year.

Let us seek, as a civilized people, to create and nourish beauty, not destroy it. LON W. SMITH
President, College Democrats, SIU-SW

BETTER SPEED CONTROL NEEDED ON WASHINGTON
To the Editor:

I wholeheartedly agree with the comments by Mr. Mark W. Smith, 2555 Washington Ave., pointing out the problems with Washington Ave. I am more fortunate than him, as I have a driveway and haven't had my auto damaged by a hit-and-run vehicle.

Basic Oxygen Furnace Became Dominant Method of Producing Steel in America During 1970

By John P. Roche
President, American Iron and Steel Institute

Technical advance marked the steel industry's performance in 1970—with greater things to come in the basic oxygen process, continuous casting, electric furnaces, and refining methods which include vacuum melting and treatment, induction and electroslag beam melting, and specification rolling.

To a greater degree than ever before, the American steel industry has become a "prescription" business—with steel possessing remarkable qualities of a long, corrosion resistance, high strength-to-weight ratio, and other advances dominating the scene.

In primary production, the basic oxygen furnace became the dominant method of producing steel in the United States during 1970, ending the 62-year reign of the open hearth.

This historic development may well be remembered long after other steel events of the year, favorable or unfavorable, are forgotten.

Basic oxygen units now produce nearly as much steel as the open hearth and electric furnaces combined. Their tonnage in 1970 totaled about 64 million tons, out of a total raw steel output of 132 million tons.

Electric furnaces continued their relative growth during the year, with output totaling 20 million tons.

This was about the same as in 1969, but it was well above 1968 output of nearly 17 million tons, and was a bigger proportion of overall steel production.

The open hearth furnaces, which in 1968 displaced the old Bessemer converters as the primary source of domestic steel, poured 48 million tons, or just 36% of the total, compared with the 30% share of 1969.

The ascendancy of the basic oxygen furnace coincided with the continued growth in continuous casting of steel and an increase in the use of degassing systems that improve the quality of steel.

Production in 1970 of about 132 million tons, although below 1969's record 141 million tons, was a significant achievement.

Estimates are that foreign producers have taken 15% to 20% of domestic markets for certain key specialty products—a decline which has had a severe impact on firms, large and small, making these products.

This is seen as a major threat to the nation's continued capacity to produce essential special steels, used in high technology areas and vital to America's defense.

Political Gifts Not Deductible

(Tri-City and Illinois Bar Associations)

If you planned to take an income tax deduction for that \$10, \$25 or \$100-a-plate political dinner, you may as well forget those plans.

Political contributions, whether viewed as business expenses, are not tax deductible.

Political contributions are deductible as gifts and are subject to the Federal Gift Tax. Consequently, not only can you not deduct a political contribution from your income tax, you may have to pay additional taxes on that contribution.

It is estimated that one out of eight people in the country helped pick up the \$225 million bill for the 1968 elections, including about \$40 million directed at the Presidential contest alone.

Those who are most affected by not being able to get a tax deduction are the big contributors—those of which 130 persons each gave away \$10,000 or more to political parties. More than 10,000 people contributed \$500 or more.

The candidate who receives these funds need not pay a tax on them if he uses them for his campaign or for other related purposes. Any amount used for personal purposes will be considered as taxable income.

The Internal Revenue Service thoroughly checked a campaign record to be certain that funds are being channeled properly. Detailed records accounting for the receipt and disbursement

of political monies must be kept available for IRS inspection.

Not only are political contributions not tax deductible, they are restricted in quantity by the federal government.

According to the Federal Corrupt Practices Act of 1925 and the Federal Election Campaign Act of 1940, a donor may not contribute more than \$5,000 to any one candidate.

However, the law does not prohibit an individual from giving up to \$5,000 to each national committee supporting a particular candidate. In recognition of this, political parties have substantially increased the number of national committees.

The law also limits each national political committee in the amount of money it may raise. This limit is set at three million dollars.

This is a tax break for some political advertising. Tax deductions for advertising in programs of national political conventions are allowed. Accordingly, a businessman who advertises in a campaign program may deduct that expense from his tax bill.

The amount should be reasonable in light of the business the taxpayer may expect to receive directly as a result of this advertising, and the contributed funds should be used only to defray convention expenses. However, this is the only kind of advertising in a political convention program which may be deducted.

25 Years Ago
1946 Ushered in Quietly Here

JANUARY 4, 1946
Residents of the Quad-Cities ushered in the New Year quietly. Despite icy streets, there was no serious traffic accidents reported to police. Numerous homes were ablaze with lights, indicative of house parties, which continue high in popularity.

The Elks Club attracted more than 250 to its annual New Year's Eve party, while night clubs scattered in and about this community also were well patronized.

Jolly Twelve Club members gave their annual holiday dinner party. Prizes went to Madamess C. W. Genard, Dan Seymour, George Koester and R. E. Harrigan.

Henry O. Lovett, president of the First Granite City National Bank, has resigned to accept another banking position in northern Illinois.

Madison Lions will hold a New Year's party at the Lakeview Inn. Orchestra, decoration and noisemaker committees have been chosen.

Cpl. Walter H. Kelly Jr., 1231 Edwardsville Road, arrived here after serving two years in the U.S. Marine Corps, Japan, the Philippines and the East Indies. His brother, Sgt. Robert L. Kelly, is home after serving in India, Burma and China.

Red Devils Take O'Fallon Cage Crown

Venice High School trounced Lebanon 83-57 Wednesday night to win the Freeburg Holiday Basketball Tournament championship for the fifth time in six years.

Lebanon held a 15-14 first quarter lead, but Coach William Ohlendorf's Red Devils took command and led 47-29 at the half and 61-41 at the three-quarter mark.

Cedric Gardner led the way for Venice's Red Devils with 27 points, while Jim Ohlendorf garnered 18. Ray Mosby 17, Doug Johnson and Tony Sinton and Algie Smith 2 each. Johnson had a turnover total of 93 points to pace the winners.

Venice had the advantage from the floor with 36 field goals compared to 26 for the losers, and from the charity stripe with 11 free throws, compared to 7 for Lebanon. Officials called 12 fouls against Venice and 8 against Lebanon.

The Red Devils reached the

By Press-Record Staff Photographer
DOUG JOHNSON

finals by defeating Chester 73-55 on Dec. 26, Valmeyer 80-54 on Dec. 28 and top-seeded Bethalto 71-59 while Galtburt edged Chesterfield 51-49 in the consolation final.

Venice travels to Vashon of

St. Louis Friday in a return engagement. Vashon topped Venice 64-57 last Dec. 5.

"We were glad to win the tournament, naturally," Coach Ohlendorf commented. "I'd say this was a team victory as everyone played well at it. Six of the four games, our opening game against Chester was the worst effort we have made all year."

"The first and third quarters against Valmeyer weren't too great. Even the boys who didn't get to play helped, win with their spirit. The cheerleaders and Venice fans also made their contribution to the victory," said Ohlendorf.

"Our game Friday against Vashon will be a real tough one meeting them on their home floor. We held them as close as they have been held the last time we met. Vashon is rated No. 1 on both sides of the river."

Ohlendorf started his coaching career with Venice 10 years ago. He played on the Red

By Press-Record Staff Photographer
WILLIAM OHLENDORF

Devils team for four years as forward and guard, graduating in 1957.

Majoring in physical education at Erskine College, he continued to play varsity basketball when he graduated. He took over the Venice coaching duties in 1961.

More About Four Killed

and was released after treatment.

Paul K. Laurie, 51, of 2814 E. 23rd St., was injured when his auto struck a Granite City Steel Co. locomotive at 5:50 p.m. Thursday at 19th Street and Edwards Road. The engine was Arthur Brocco, Caseyville.

Lacy Lee Boyer, 47, of Rural Road Two, was injured when he was struck by a Granite City Steel Co. locomotive at 5:50 p.m. Thursday at 19th Street and Edwards Road. The engine was Arthur Brocco, Caseyville.

John Boston Jr., 17, of 2624 E. 23rd St., complained of pains after his auto was struck from behind by a hit-and-run driver at 12:45 a.m. Thursday at Nameoki and Fehling Roads. Nameoki school, was born here.

Both mothers and daughters were members of the Second Baptist Church.

In addition to her husband and children, Mrs. Kraus is survived by three sisters, Mrs. Muskin, Mrs. Josephine Herbert of Pequotia, N.J., and Mrs. Verdie McCracken of Pequotia, Ia., and two brothers, Calvin and Daniel Penrod, both of Granite City.

Joint funerals will be held Wednesday. Details are given in today's obituary column.

Two Persons Killed

Two persons were killed when auto drivers crashed into a

Barnerd, 22, of Bethalto, and Robert D. Tuttle, 27, of Wood River, collided at 9:10 p.m. Wednesday.

Dead were Mr. Tuttle and a

Barnerd, 22, of Bethalto, was listed in critical condition at Barnes Hospital, St. Louis.

State troopers were unable to determine the details of the accident.

Donald Rodgers, 22, of Earle, Ark., was injured when he lost control of his auto and struck a tree in the yard of Ray Place, 1433 Madison Ave., at 5:45 a.m. Saturday. He was a

freight car driver. He was not

rescued by a fire department unit.

He was admitted to St. Elizabeth Hospital with fractures to both legs and an ankle.

Emily Adams, 68, of 500 Main St., Florence, a passenger in a

auto driven by Norma Adams, same address, complained of pains after she was struck by a car driven by

James Lewis, 2104 Cleveland Blvd., at 3:10 p.m. Saturday at Nameoki Road and Pershing Avenue. Lewis was charged with making an improper turn at an intersection.

Driver Injured

David E. Rozell, 29, of 2535 Sheridan Ave., was injured when his auto struck and damaged two autos owned by the Granite City Dodge Agency, 1911 Madison Avenue, at 3 a.m.

Rozell, who was charged with careless driving, was admitted to St. Elizabeth Hospital with a fractured neck. X-rays were taken of the skull and face.

Randall Hall, 208 Edwards Road, was taken to St. Elizabeth Hospital at 8:10 p.m. Wednesday with injuries sustained in a traffic accident. He had abrasions and contusions to the jaw and a bump on the head.

Parked Auto Struck

The parked auto of Virgil H. Smith, 2458 Illinois Ave., City, was struck in the left side by a truck driven by James Hicks, 1327 Rhodes St., at 1:30 p.m. Friday at E. 20th Street and Missouri Avenue.

Smith was called at 9 p.m. Sunday to St. Elizabeth Hospital where there was a fire in a laundry chute. The sprinkler system went off, and damage was minor.

Fire Destroys

the scene three hours and 25 minutes.

Shortly after the alarm, firemen were dispatched to the scene.

A fire at 8:06 p.m. at 2606 Denver Ave. where the loss was estimated at \$150.

A fire was called at 9 p.m. Sunday to St. Elizabeth Hospital where there was a fire in a laundry chute. The sprinkler system went off, and damage was minor.

Backs into Parked Car

A pickup truck driven by City Youth 2406 Edwards St., backing out of his driveway, struck the left rear fender of the parked auto of Roy Morris, 2218 St. Clair, at 8:40 p.m. Friday.

Ask Your Game Warden

By DONALD HASTINGS
Conservation Office

This has been one of the busiest hunting seasons in memory.

We seem to have more persons hunting this year, and along with it came more violations.

Here are the rundown for the first two months of the season:

Over the limit of pheasants, 1; duck hunting before noon on opening day, 3; no timber buying license, 1; hunting without permission, 5; trapping before season, 2; night rabbit hunting in auto, 1; hunting rabbits before season with beagles and gun, 1; duck hunting before sunrise, 11; uncased gun in auto, 2; and littering streams, 4.

Now when season is in, know when shooting hours are, get permission, case your gun in the auto and stay within the limit. Fines on these run from a low of \$55 to a high of \$60 apiece. It's wasted money.

I seem to be getting few good hunting reports of any Quail is fairly good but not as good as last year. Rabbits are terrible unless you get to go every Sunday or so find one of the populated little pockets that still exist in a few places.

Duck have been in good supply earlier but river fluctuation and poor sportsmanship by high pressure hunters have ruined trips for a lot of people. It boils down to the fact that the occasional hunter who only gets to go every Sunday or so has little chance.

The hunters who are having a good season are those with time to do a lot of pre-hunting scouting of territory and populations and can spend the time hunting trip hunting instead of half of it or more looking for the spot where the game is.

Deer permits sold out.

This is the first deer season that Madison County permits were sold out completely.

A tree in the yard of Ray Place, 1433 Madison Ave., at 5:45 a.m. Saturday. He was a freight car driver. He was not rescued by a fire department unit.

He was admitted to St. Elizabeth Hospital with fractures to both legs and an ankle.

Elderly Home Owners May Apply For Tax Credit

Home owners in Granite City Township over the age of 65 may reap the benefit of the \$1,500 real estate tax exemption under the Illinois Homestead Act during January at the new office of James Burton, township tax assessor, 2037 State St.

Persons who applied last year need only to sign a form and will be applying for the exemption for the first time will be required to bring the title to the property to the office, Burton said.

However, persons reaching the age of 65 this year and who will be applying for the exemption for the first time will be required to bring the title to the property, Burton added.

If some persons are unable to come to the office, home calls will be made upon request, Burton said.

The new office is located on the first floor for easy access, and there are no steps to climb, the assessor noted, while at the previous location in the 1900 block of Delmar Ave. there was a long flight of stairs to the second floor office.

Barton noted that the constitutionality of the Homestead Act is under question as it was declared illegal in a Cook County court. But the office of the state attorney general has appealed the case to the Illinois Supreme Court, maintaining that the decision applies only to Cook County. The high court is to convene on Jan. 11.

Services Held Sunday For Mrs. Mary Wallace

Funeral services were held yesterday at a Greenville, Mo., funeral home for Mrs. Mary Altha Wallace, 84, of Greenville, Mo., who died at 3 p.m. Thursday at the Poplar Bluff Hospital, Poplar Bluff, Mo., where she had been a patient since suffering a heart attack six weeks ago.

She was the mother of Joseph A. Wallace Jr., of Granite City, a printer for the Granite City Press-Record, and Mrs. Golda Chilkut who recently moved to Greenville, Mo., but lived here since 1929.

Mrs. Wallace was born in Piedmont, Mo., and lived in that area her entire life. She was a member of the First Baptist Church in Greenville, Mo., and was active in the church's Women's Missionary Society chapter. Her husband, Joseph A. Wallace Sr., died in 1959, and one son, Aubrey Wallace, died in 1966.

Other survivors are another son, Raymond Wallace of Louisville, Ky.; three other daughters, Mrs. Myrtle Dunn of Greenville, Mo., Mrs. Eunice Shinto of Belleville and Mrs. Floy Bryan of Zalma, Mo.; 18 grandchildren and 24 great-grandchildren.

Interment was in City Cemetery, Greenville, Mo.

Retailers Will Hear Buck at Annual Dinner

The 65th annual membership dinner of the Associated Retailers & Civic Association will be held Wednesday, Jan. 27, at 7 p.m. at the Rosewood restaurant, with Jack Buck, voice of the St. Louis baseball Cardinals as guest speaker.

A Jan. 15 deadline has been set for reservations at the Retailers' association, 1001 Old Fleishman, has announced.

Hit-and-Run Accident

An auto owned by Jerry Conner, 2569 Madison Ave., parked at his home, was struck in the rear by a hit-and-run driver at 7:35 p.m. Wednesday.

Hospital Notes

Patients admitted to St. Elizabeth Hospital Tuesday, Dec. 29:

Kenneth Gibson, 2117 Ohio; Bessie McKee, 1301 1/2 Edwards; Charles Baker Key, Collinsville; Gloria Ziegler, Fessenden; George Justice, 26 Briarcliff; Vallee Rollins, 414 Second; Mildred Ward, 2040 Washington; Mary Henderson, 1234 Greene; Randall Parks, 2067 Circle Drive; Wayne Barnes, 4912 Hills; Dennis Kelsch, 1701 Mitchell; Leola Kibler, 724 East Chain of Rocks Road; Alta Carpenter, 3820 E. 24th; Kathryn Steward, 4612 Vine; Shirley McKeel, 16 Fontainebleau; Karen Winters, 220 Jefferson; Madison; Edna Freeze, 2411 N. TOP RECRUITER. Debbie Griffin, daughter of Mr. and Mrs. Richard Griffin, 2007 Garfield Ave., receives a bicycle as the top award in a membership recruiting contest from Mike Rapoff, a YMCA Youth Department assistant. The prize winner sold \$127 worth of Y memberships in the five-week drive. The bicycle was donated by W. T. Grant Co.

Classes Begin Jan. 11

Registration Starts for Adult Education Courses

Registration starts today for students wishing to enroll in the spring semester series of Adult Education courses offered at Granite City High School.

Prospective students may register at the high school office, 3101 Madison Ave., today through Thursday, between 8 a.m. and 9 p.m. Classes will get underway next Monday, Jan. 11.

Adult courses to be offered this semester range from "English as a Second Language" and "Data Processing" to "Sheet Metal Layout" and "Stenography."

Specific courses are: General Education Development—an organized review for State High School Equivalent Certificate examination; English as a Second Language; Driver Training; Art, including free hand drawing, oil painting, ceramics and water colors.

List Other Courses
Sewing—beginner and advanced; Bookkeeping—beginner, intermediate and advanced; Of-

fice Machines; Stenography—beginner, intermediate and advanced; Typing—beginner, intermediate and advanced (written communications in business).

Data Processing—basic concepts and operation of basic machines, and advanced machine operation; Industrial Mechanics; Pipefitting; Welding—gas, electric, shielded-arc (helium) and wire welding; Sheet Metal Layout—simple and advanced layouts and triangulations.

Blueprint Reading—basic blueprint reading, electrical, mechanical and structural; Electricity—direct current 11, alternating current 11, electric control systems 11 and air conditioning and refrigeration.

Industrial Mathematics—basic mathematics, applied algebra, applied geometry and applied trigonometry; Machine Shop—bench work, lathe, shaper, milling machines, grinders and numerical control.

Mathias Hadaller, 69, Dies of Heart Ailment

Mathias Hadaller, 69, of 2457 Benton St., was dead on arrival at St. Elizabeth Hospital at 7:45 p.m. Saturday. He had a heart condition.

Born in Effingham, he resided here 50 years. He was employed 44 years as an electrician at General Steel Industries before retiring in 1964 and had been general foreman of the electrical department since 1947. He was a member of St. Peter United Church of Christ.

He is survived by his wife, Mrs. Florence Hadaller, a daughter, Mrs. Robert (Betty) McCabe of LaMira, Calif.; three brothers, George, Theodore and Walter Hadaller, all of Granite City; five sisters, Miss Rosella Hadaller, Miss Anna Hadaller and Mrs. M. D. (Kathryn) Cox, all of Granite City; Mrs. W. E. (Josephine) Murray of Kissimmee, Fla., and Mrs. Marie Hamilton of Long Beach, Calif.; and three grandchildren.

An obituary notice appears elsewhere in this issue.

Card of Thanks 32

We wish to express our sincere thanks and appreciation to our many friends who were so kind to us during our recent bereavement and also for the beautiful floral offerings.

THE FAMILY OF STEVE KELIO

We wish to thank our friends and relatives, Rev. Carl Watkins, the Third Baptist Church, Mercer Funeral Home, pallbearers, for their kindness, words of sympathy and floral offerings in our late bereavement of our Uncle.

MR. & MRS. VERNON ARNO AND FAMILY

We wish to acknowledge sincere thanks and appreciation to the kind expressions of sympathy shown us since the death of my beloved father, ELMER T. DOWN. Special thanks to Rev. Allen Groff, those who rendered music and floral offerings, and the Mercer Funeral Home.

MR. & MRS. WILLIAM E. DOWN.
MR. & MRS. WILSON ANDREWS.
MR. & MRS. RICHARD ECCLES

I want to express my sincere appreciation to all my friends, relatives, Pastor Dunning, Dr. Otto Bower, Dr. Carl Bower, and the Mercer Funeral Home for the intensive care unit of St. Elizabeth Hospital for the kind and sympathy extended to me and my beloved husband WALTER L. HORMAN. Also to the friends who gave me the beautiful floral tributes.

FRIDA HORMAN

In Memoriam 33

In memory of JAMES READ who died January 4, 1899. Deep in our hearts a memory is kept. Of the one we loved and will never forget.

A silent thought, a secret tear, is kept throughout each lonely year.

Sadly missed by
MOTHER, BROTHERS, AND SISTERS

In loving memory of a brother, FLOYD C. WORTHEN, who departed this life, Jan. 5, 1971. Wednesday comes with sad regret. It brings back a day I'll never forget. One so thoughtful, kind and true. Had to bid this world adieu. Loving and kind in all his ways. Upright and just to the end of his days. Sincere and true in heart and mind. Fond memories he left behind.

Sadly missed by sisters
JENNIE PETERS, MARY WORTHEN

God knows how much I miss you. Never shall my memory fade; Loving thought shall ever wander. To the spot where he is laid.

MRS. IRENE BALDWIN, WIFE
Four years has passed since that sad day. When one we loved was called away; God took her home—it was His will. Within our hearts she liveth still. DAUGHTER AND HUSBAND

ORDINANCE NO. 2747

RESTRICTING PARKING

WHEREAS, a hazardous condition exists in the City of Granite City, Illinois as reference to parking and traffic conditions.

Section 1: It shall be unlawful for the driver of a vehicle to park a vehicle in excess of two hours on the easterly side of Iowa from 2300 Iowa to 2300 Iowa from 8:00 a.m. to 5:00 p.m., excepting Saturday and Sunday.

Section 2: The Superintendent of Streets is hereby authorized and directed to post appropriate signs along Iowa and upon the street for the purpose of enforcing this Ordinance.

Section 3: This Ordinance shall be in full force and effect from and after its passage, approval and publication as provided by law, and upon the installation of the proper control signs at said location by the Superintendent of Streets.

Section 4: Any person, firm or corporation violating a any provision of this Ordinance shall be punished by a fine of not more than One Hundred Dollars (\$100.00) or less than Five Dollars (\$5.00).

Section 5: All Ordinances or parts of Ordinances in conflict herewith are hereby repealed.

PASSED BY THE CITY COUNCIL OF THE CITY OF GRANITE CITY, ILLINOIS this 21st day of December, A.D., 1970.

APPROVED BY THE Mayor of the City of Granite City, Illinois this 28th day of December, A.D., 1970.

NEW YEAR'S EVE PARTY
Mr. and Mrs. Harry R. Johnson entertained with a New Year's Eve party in their home, 1538 Third St. The home was appropriately decorated and the guests were welcomed by candlelight by the hosts.

The evening was spent with conversation, games and photographic slides. Refreshments were served to Mr. and Mrs. Clifford Cawner, Mr. and Mrs. Clarence Schumacher, Mrs. Mary Alexandra, Mrs. Paula Smith, Mrs. Ruth Cawner and Mrs. Florence Hager.

PARTY FOR LEADERS

Girl Scout leaders of Neighborhood One held their holiday party at the home of Miss Dorothy Hinson last week. A dinner was enjoyed and a business meeting was held, conducted by the neighborhood chairman, Mrs. Linda Noud.

The district advisor, Miss Judy McCarthy of Collinsville, was present and gave information from the council.

An exchange of gifts took place and games were played, with prizes awarded. Those present were Mrs. Virginia Landwehrmeier, Mrs. Irene Baker, Mrs. Jackie Frizzell, Mrs. Judy Donaldson, Mrs. Ann Bernhardt, Mrs. Evelyn Toller, Mrs. Thelma Skelly and daughter, Christie, Mrs. Horstense Carnes, Mrs. Carrie Matkins, Mrs. Mae Hendrickson, Mrs. Rose Lawrence, Mrs. Marie Mulnik, Miss Mary Mulnik and Mrs. Bernadine Weidner.

The next neighborhood meeting will be held Jan. 25 at Harris School at 7:30 p.m.

Seaman Samuel Becerra, who is aboard the S.S. Keppler, telephoned on New Year's Day to his grandmother, Mrs. Ruth Evans, and his fiancée, Miss Kathie King.

SEVENTH BIRTHDAY

Billy Fedorchak celebrated his seventh birthday Wednesday evening at the home of his grandparents, Mr. and Mrs. Sam Paul Taylor, 2031 Beck with Ave. He is the son of Mr. and Mrs. William Fedorchak Jr., Lake Zurich, near Chicago.

Mrs. Fedorchak is the former Paulette Taylor.

The family moved to Lake Zurich in August. Mrs. Taylor had the table decorated for the birthday celebration.

Those seated were Mr. and Mrs. William Fedorchak, paternal grandparents, Mrs. Jeanette Taylor and sons, Mike and Tommy, Larry and Donny Broadway, Miss Laverne Prill, Bobby Prill, Gary and Terri Taylor, Deborah Fedorchak and Mr. and Mrs. Taylor.

Gifts were presented to the honoree. The Fedorchaks returned to their home Sunday after spending the Christmas and New Year's holidays with the parents and visiting other friends and relatives.

Road Bond Referendum Sought by Ogilvie

The 1971 session of the Illinois General Assembly—scheduled to convene in Springfield Wednesday—will be asked by Governor Richard B. Ogilvie to authorize another highway bond referendum.

The governor did not disclose the amount of the bond issue he will seek but said it will be "considerably less" than the \$2 billion proposal authorized by the voters in 1969. The debt never was incurred after the Supreme Court held the authorization was unconstitutional.

The \$2 billion in bonds approved in 1969 would have been used for construction of a new supplemental freeway system. Ogilvie had hoped to build a statewide system of supplemental highways which would interconnect existing routes.

Both young people are 1970 graduates of the Granite City High School and Mr. Rigby is

Price Against Army Checking on Civilians

Cong. Melvin Price of this district, second ranking member of the House Armed Services Committee, said during the weekend that he thinks it is improper if the Army has been spying on civilians.

Two East St. Louisians said Saturday that Army agents had checked on militants, civil rights activists and two public officials, keeping them under surveillance until early 1970.

Purpose of the alleged intelligence activities was to determine whether any Granite City Army Depot or Scott Air Force Base employees residing in East St. Louis might be antagonistic toward the military bases.

Sheriff in Collision

Marlin R. Gusewelle, 19, Hamel, suffered leg bruises at 9:15 p.m. Wednesday on Illinois 159 at the Montclair Bowl, Edwardsville, when his south-bound auto was struck in the rear by a car driven by Sheriff John Maeras. Gusewelle, who had halted for a left turn, was accompanied by Bob Heitz, Edwardsville, head and neck pains, and Bill Krieger, Edwardsville, headache. Maeras was unhurt.

Wheat Yields May Be Based on Production

Wheat producers may elect under the 1971 program to have their farm program yield based on actual production rather than estimated by the county committee, Cliff Losch, chairman of the Madison County Agricultural Stabilization and Conservation Committee said today. Wheat farmers meeting the requirements that desire to prove their farm yield must file a request with the local ASOS Office not later than mid-January, Losch announced. Farm program yields are used to determine the farm payment.

To prove the farm wheat yield, the farm must have an allotment and harvested wheat in each of the years 1967, 1968 and 1969. Evidence of production such as scale tickets or sales and warehouse receipts must be furnished for the farm along with information on the acreage harvested. Interested wheat producers may contact the Madison County ASOS Office at Edwardsville, Losch emphasized. Under the new wheat program, yields can not be proven after the farmer has been notified of his official farm yield for the 1971 program.

Alcohol, Driving Poses No. 1 Traffic Problem

Chief of Police Ronald J. Veizer today warned Granite City motorists that the winter season puts us face to face with the nation's number one traffic problem—alcohol and driving. "Drinking and winter weather are already pushing our accident curve upward," Chief Veizer commented, and he was emphatic about counter-measures his department is taking.

"We're out with all the manpower we can muster to protect everyone from the dangerous thinking that anyone can overindulge and then slide behind the wheel of a car."

"Research information circulated by the International Association of Chiefs of Police indicates that alcohol is a factor in as many as half of our traffic accidents," he said. And he quoted from "The Driver's Guide to Drinking," published by the National Safety Council.

"The occasions for drinking are endless. So are the chances for accidents on the highway. You can help solve the No. 1 highway problem if you understand alcohol and what it does."

Understand what alcohol does to you.

Know your limitations and stay within them."

"Contrary to popular belief, alcohol is a depressant, not a stimulant," Chief Veizer pointed out.

The NSC report supports this view of the effects of alcohol:

"Alcohol slows reflexes, impairs coordination, reduces visual acuity. It dulls normal caution. Concentration becomes difficult. You can't think as clearly, as quickly or as rationally as you usually do. And you can't act as fast."

Put a person in this condition behind the wheel of a car, add winter's poor visibility and inadequate traction, and you multiply beyond all reason the chances of a tragic crash, Chief Veizer pointed out.

How much a person can drink varies, according to experts. Alcohol build-up in the blood depends on: (1) the amount of alcohol (number and strength of drinks); (2) time elapsed since drinking began; (3) body weight; and (4) quantity and kind of food in the stomach.

"However, in our state," Chief Veizer emphasized, "the level established by law for driving under the influence is 0.10. That's more than enough to make anyone unsafe as a driver."

So if you should overdo, it would be well to heed the chief's advice:

"Black coffee, cold showers, fresh air or other folklore remedies won't help. Time is the only answer—time for your body to dispose of the alcohol."

"And after several drinks, that time may be several hours before it's safe to drive again."

Mrs. Ethel Dearing Dies at Age of 90

Mrs. Ethel M. Dearing, 90, of 1533 Johnson Road, died at 8:10 p.m. Saturday at St. Elizabeth Hospital where she was a patient 10 days. She was ill two weeks.

Born in Westerville, Ill., she lived in Granite City eight years. She was a member of the First Presbyterian Church in Shelbyville, Ill. Her husband, George Dearing, died in 1949.

She is survived by two daughters, Mrs. Frances Toburen of Granite City and Mrs. June Doig of Wichita, Kans., a sister, Mrs. Grace Hamilton, four grandchildren and one great-grandchild.

An obituary notice appears elsewhere in this issue.

St. Margaret Mary Has New Lunch Policy

St. Margaret Mary School of Granite City has announced a new policy to determine children eligible to receive free or reduced price lunches. The school district has long recognized the need for helping meet the nutritional needs of students. A well-balanced, nutritious lunch is served each school day at St. Margaret Mary School.

The charge to students who can pay is 40 cents daily. However, since some families may find it difficult to pay the full price for their children, the school will provide these lunches free or at a reduced price to those children determined eligible. Sister Marie Monica, Principal, is the authority responsible for making determinations.

Families who believe that their children may be eligible for free or reduced price lunches are urged to apply. Copies of the application form and information regarding procedures for application were sent to parents Dec. 15. Additional copies may be obtained or the complete district policy may be reviewed by any interested person at St. Margaret Mary School.

The completed application, signed by an adult family member should be sent to Sister Marie Monica, Principal. Such applications will be reviewed within five days and the family will be notified in writing of the decision made. Information proved on the application will be held in the strictest confidence.

Decisions for approval will be based primarily on the family income level according to a national guideline used by participating schools throughout the United States and prescribed by the Secretary of Agriculture.

Any unusual circumstances or hardships which affect the family's ability to pay for the lunch will also be considered. If a family is not satisfied with the decision made regarding their application, they may appeal the request to Rev. Edward Groesch-Pastor who will review the application to try to make satisfactory arrangements. The district policy will be applied fairly and uniformly to all children. The new policy became effective Jan. 1.

POLICE SCHOOL GRADUATE, Birl Reed, Venice Police Department, is among graduates of a recent six-week Basic Law Enforcement course conducted by the Police Training Institute of the University of Illinois Division of University Extension at the University's Urbana-Champaign campus. Pictured with Reed is PTI instructor Gary R. Wilson.

Funeral Services Held For Leo Kalips Sr., 70
Funeral services were held Thursday at Sacred Heart Roman Catholic Church, 2086 Washington Ave., for Leo "Noisy" Kalips Sr., 70, of 2937 Kirkpatrick Homes, who died Tuesday at St. Elizabeth Hospital.

A retired Diesel engineer at General Steel Industries, Mr. Kalips is survived by his widow, Mrs. Lena Kalips; two sons, Frank and Leo Kalips Jr., both of Granite City; two daughters, Mrs. Edwin (Patricia) Tapp and Mrs. Frank (Mary) Scarsdale, both of Granite City; 21 grandchildren and five great-grandchildren.

Census on Consumer Buying Set This Month

Questions on consumer buying and home improvement expectations will be asked by representatives of the Bureau of the Census in this area during January, according to Curtis T. Hill, director of the bureau's regional office in Chicago.

The questions are asked four times yearly as part of a nationwide effort to collect information as a guide to federal agencies and other groups in developing programs based on consumer spending patterns.

A sample of residents in this area will be asked if they expect to buy a house, car or major appliance during the next year and if they have made recent purchases of these items.

Homeowners will be asked about home improvements and repairs during the last three months and any planned for the future.

In the third quarter of 1970, the survey indicated that consumer spending plans were little changed from the second quarter, while the percentage of families expected their incomes to decline within 12 months had increased for the fourth quarter in a row.

Information supplied by individuals participating in the survey is kept confidential by law and will be published only in the form of statistical totals. The Census Bureau representative in this area is Mrs. Mary Lou P. Gallagher.
